SUNDAY 25-10-2026 · ABIDS · TEST APP ONLY

Face check-in test: day card

Already set for you: face scan is ON on the TEST server; the TEST Abids centre is at the real Abids place, 150 m, check-in open 14:00–20:30 (class 14:30–20:00). Nothing here touches the class's real app or data.

Bring

- Printed English consent forms (one per volunteer), results sheets (one each), a pen
- Your phone with a **TEST coordinator** login, and a second coordinator (nobody confirms their own face)

Test app link (send only to volunteers)

`https://expo.dev/artifacts/eas/w_HNvQbsx_Tgcl_Az2WNCgMdSsd5Bjov4T8xMzZzTcs.apk`

Android asks to allow installing from the browser: allow. Open the app, close it, open it again (it updates itself).

Each volunteer (about 10 minutes)

1. Adults 18+ only. They read and sign the consent form; write their tester code T1, T2 … on it.
2. They install the TEST app and sign up in it (or use an existing TEST login).
3. Coordinator: **Register a student** (Students tab) → accept them; date of birth must show 18+.
4. Coordinator: Students → the volunteer → **Face scan at the desk** → tick the signed form → record consent.
5. Volunteer: My profile → **Face scan** → Turn on → blink / turn → 5 pictures → a 6-digit code.
6. Coordinator types the code in Face scan at the desk → their phone says face scan is on.
7. Volunteer: home → **Check in** → **"Checked in at …"**.

A coordinator testing themself: their TEST coordinator login linked to an own TEST student record (Coordinators → them → Own student record), then **Me** → **Face scan**; a colleague records and confirms.

Checks (write each on the results sheet)

Wrong person	Another volunteer, ALONE in front of the phone → must be **refused** (no match).
Photo / video	Printed photo or a photo on another phone → must be **refused**.
Too soon	Check out within 10 minutes → refused (the desk does it).
Away	After 10 minutes, 250 m or more away → check out **saved, marked away**.
Normal / glasses / dim light	The person themself: note how many tries it took.
QR	QR check-in at the desk still works as always.

What a refusal means

Not at class / outside	GPS says outside 150 m: go inside, wait a moment, try again.
No Check in circle	Before 14:00 or after 20:30, or face scan not set up on this phone yet.
Phone check failed	Play Integrity said no: note the phone model, use QR.
No match	Face not matched: up to 3 tries, then QR.
More than one face	Only one person in front of the camera.
Camera problem / stuck	Cancel, close the app fully, open it again.

STOP at once if a wrong person or a photo is ever ACCEPTED: no more face tests today, note the phone, time and tester codes, and tell Claude on Monday. A volunteer who wants to stop: My profile → Face scan → Turn off.

Collect

- Results sheets; a screenshot of any odd message (with the time); each phone's model and Android version

- Leave face scan ON; on Monday Claude switches it off, resets the centre and runs the deletion (by Sunday 01-11-2026)
