Coordinator guide

Running the class with the app, step by step, with pictures

For coordinators. The pictures come from the test copy of the app with a made-up coordinator ("Coordinator Test") and made-up students; a few lists were filled with sample names for the picture. Phase 2 of the guides. The student guide came first; the Guru's guide follows.

What is in this guide

	The coordinator area at a glance	3
1	Sign in, and set up your sign-in code	4
2	The menu and My profile	5
3	Accept people who signed up	6
4	Register a student at the desk (Fill the form)	7
5	Check students in at the door	8
6	Who is in class, and Check out all	9
7	Find a student and open the student page	10
8	Mark progress: tick the syllabus	11
9	Follow-ups: call a student who stopped coming	12
10	Post an announcement	13
11	Groups for announcements	14
12	Give an assessment to students	15
13	Follow an assessment and review recordings	16
14	Level-ups: recommend a student, give feedback	17
15	Events and polls	18
16	Instruments: lend and take back	19
17	Seva roster and students' practice	20
18	Print QR cards for students without a phone	21
19	My reports	22
	Quick help	23

How to read this guide

One page, one job

Each page shows one thing you do, for example "Check students in at the door". Read the title, then follow the numbers.

Red numbers

A red circle on a picture marks where to tap or look. The same number under the picture tells you what to do there. The arrows show the order of the screens.

Words in bold

Bold words are written exactly as the app shows them, so you can find the button.

If something goes wrong

The red box at the foot of each page says what to do when there is no internet, a save is refused, and so on.

Tap and Back

Tap = touch once with your finger. The arrow ← at the top left goes back one screen.

Android app or web

The screens are the same in the Android app and in the web version. On a laptop the tabs sit at the left instead of the bottom.

START HERE

The coordinator area at a glance

Every coordinator the Guru has given the coordinator role.

After you sign in, the app opens on **Home**. Everything starts from the menu button, the three boxes, the circles around the drum and the five tabs at the bottom.

Home

1	The menu: **Overview**, **Groups**, **Level-ups**, **Practice**, **Suggestions**, **Class fund**, **My reports**, **Notifications**, and **View my profile**	**5, 14, 17, 22**
2	The bell: **Notifications**, with the number not read	**5**
3	**in class now**, **check-ins today** and **to do**: what waits for you (people at the desk, calls due, recordings to review)	**9, 12**
4	**Me**: your own QR and progress, only when the Guru linked your login to your own student record	
5	**Welcome desk**: people who signed up, and registering a student	**6, 7**
6	**Newcomers**: who joined in the last weeks, with their visits	**10**
7	**Instruments**: lend, take back, labels	**19**
8	**Seva roster**: your shifts	**20**
9	**Assessments**: give one to students, follow it, review recordings	**15, 16**
10	**Lessons** and 12 **Ishtagoshti**: the same as the students see (the Guru edits them)	**10**
11	**Events & polls**	**18**
13	Tabs: **Home**, **Check-in**, **Students**, **Follow-ups**, **News**	**8, 10, 12, 13**

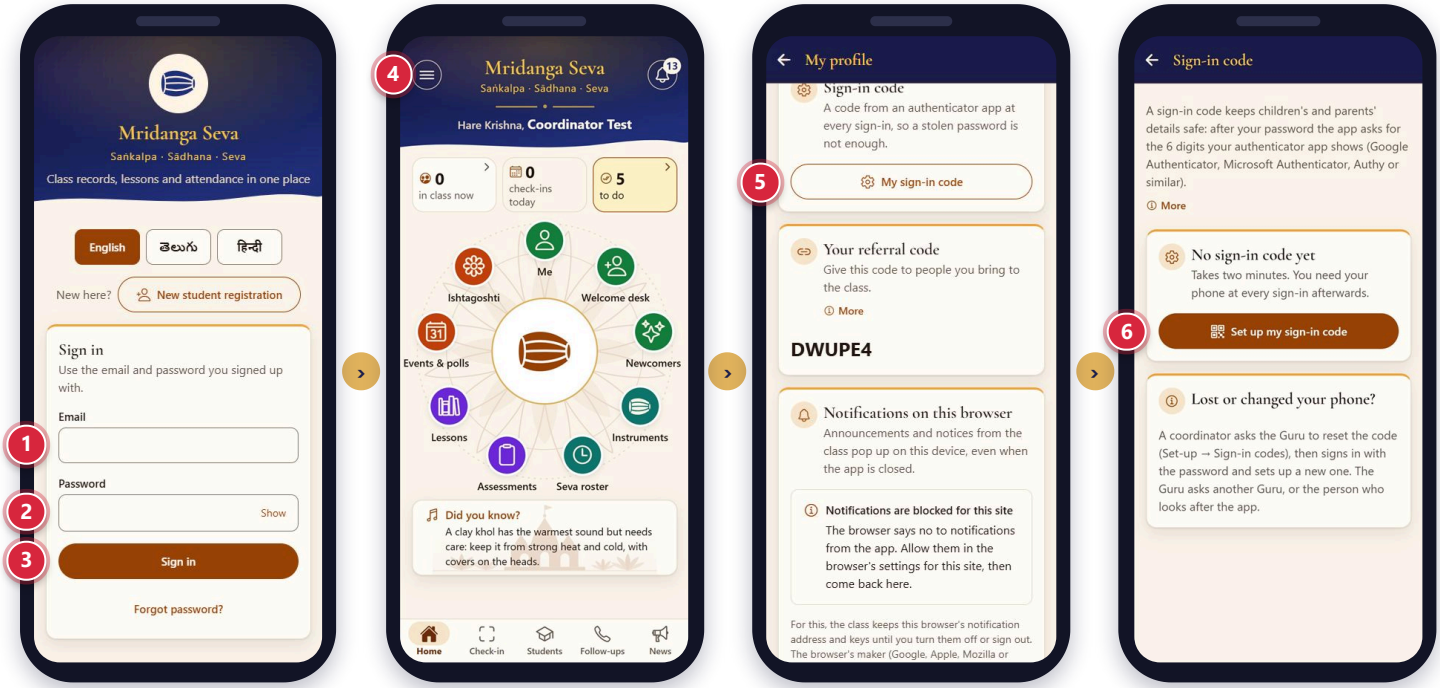

A card about the privacy notice may show at the top of Home once: read it, tick and tap **Agree**, as students do. Nothing is blocked meanwhile.

1 · GETTING STARTED

Sign in, and set up your sign-in code

For: Every coordinator. The Guru may ask every staff member for a sign-in code.

Staff see children's and parents' details, so a password alone is not enough. A sign-in code from an authenticator app on your phone keeps them safe.

1 Your email, 2 your password, 3 **Sign in**. Then type the 6 digits of your code if asked.

4 Open the menu, then **View my profile**.

5 Under **Sign-in code** tap **My sign-in code**.

6 **Set up my sign-in code**: add the app to your authenticator, type one code, **Turn on my sign-in code**.

Install an authenticator first (Google Authenticator, Microsoft Authenticator, Authy). After that, every sign-in asks: after the password, the **Sign-in code** screen wants the 6 digits the authenticator shows; tap **Continue**. A new code comes every 30 seconds.

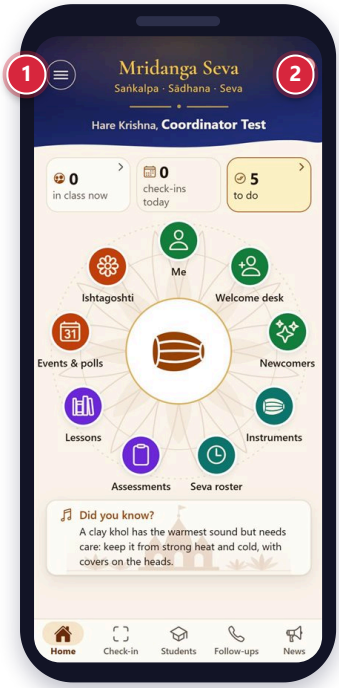

If something goes wrong

- "That code is not right": type the code the authenticator shows now, not an old one.
- Lost or changed your phone: ask the Guru to reset your code (Set-up → Sign-in codes), sign in with the password and set it up again.
- "Private details need your sign-in code": the Guru asks for codes and you have none yet. Everything else works; set it up to see parents' details and call notes.

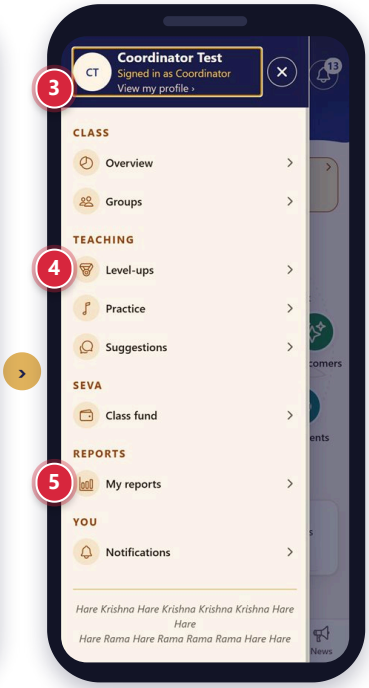

The menu and My profile

For: Every coordinator.

Screens that are not on Home or in the tabs are in the menu. My profile holds your language, the look of the app and Sign out.

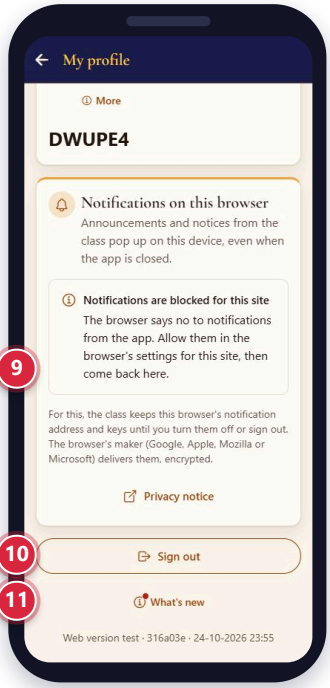

1 The menu button. 2 The bell: your **Notifications**.

3 **View my profile**. 4 Teaching: **Level-ups**, **Practice**, **Suggestions**. 5 **My reports**.

6 **Language**. 7 **Appearance**. 8 **Change my name or phone**.

9 **Notifications on this browser** (web). 10 **Sign out**. 11 **What's new**.

Your referral code in My profile: give it to people you bring to the class; they type it in About you, and the Guru sees how students found the class. **See my data and rights** shows what the class keeps about you.

If something goes wrong

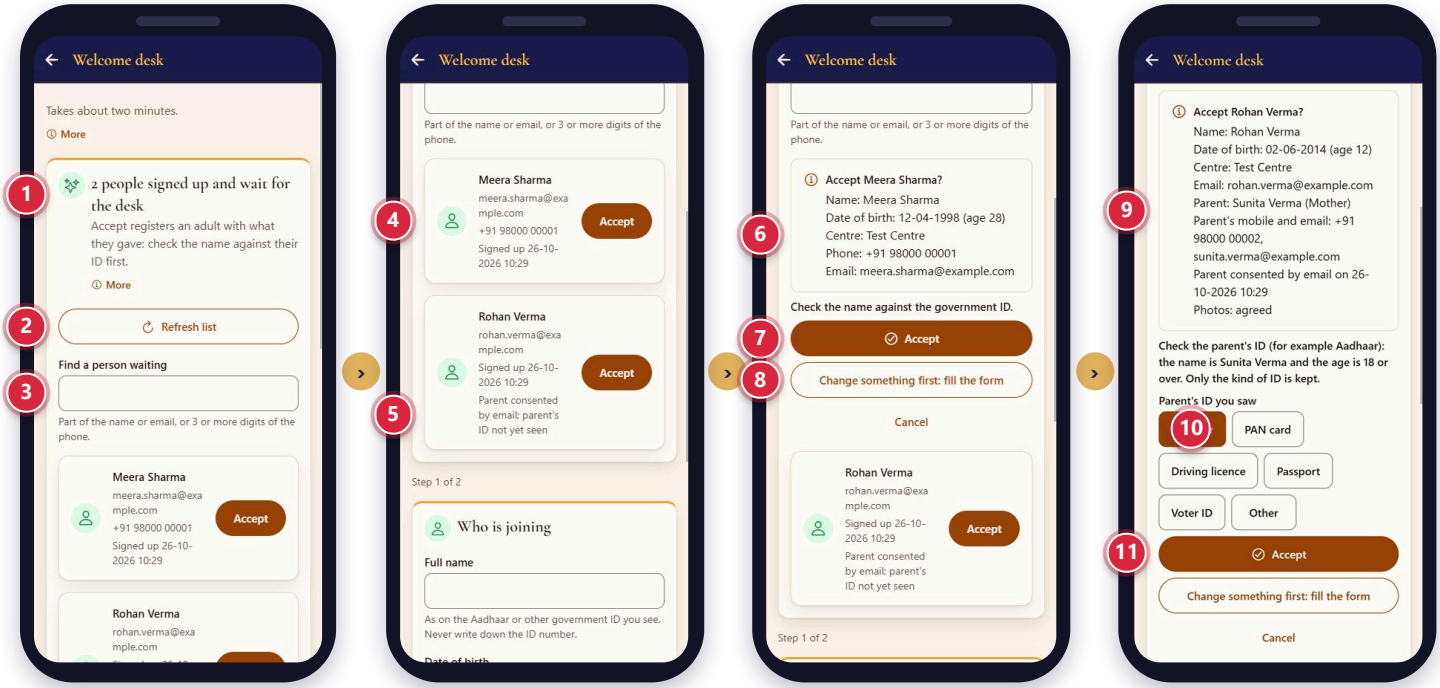

- "Notifications are blocked for this site": allow notifications for the class site in the browser's settings, then come back.
- Sign out on a shared or borrowed phone. Check-ins waiting for the signal are lost if you sign out before they are sent (page 8).

3 · WELCOME DESK

Accept people who signed up

For: The coordinator at the class desk.

People who made an account at home wait for the desk. Check their name against an ID, then accept them: the app registers them from what they typed and gives a roll number.

1 Home → **Welcome desk**: who waits. 2 **Refresh list**. 3 **Find a person waiting**.

4 **Accept** beside the person. 5 A child: "**Parent consented by email**".

6 Check name and age against the ID. 7 **Accept**. 8 Something wrong? **Change something first: fill the form**.

A child: 9 the parent's details. 10 Tick the parent's ID you saw. 11 **Accept**.

Only the kind of ID is kept, never its number. A child appears in the list only after the parent has agreed by email; the parent comes to the desk with an ID the first time.

If something goes wrong

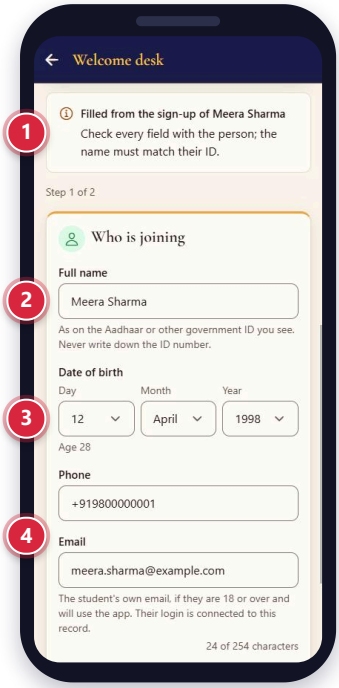

- Nobody in the list: tap **Refresh list**. The person may not have opened the email link yet, or signed up at another centre.
- "Possible duplicate": the same name and date of birth, or phone, is already there. Open it and check before you accept.
- No date of birth, or under 18 without the parent's consent: only **fill the form** is offered (page 7).

4 · WELCOME DESK

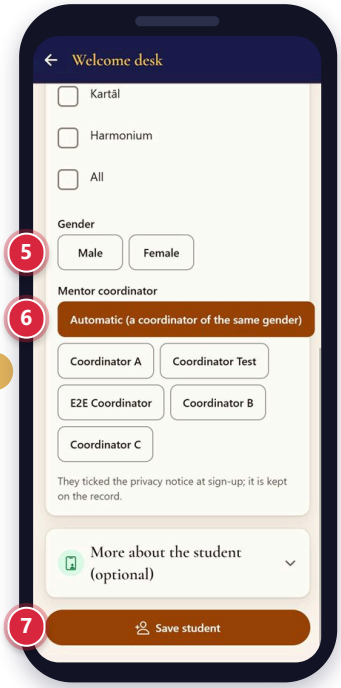

Register a student at the desk (Fill the form)

For: The coordinator at the class desk. For walk-ins, and for sign-ups that need a change.

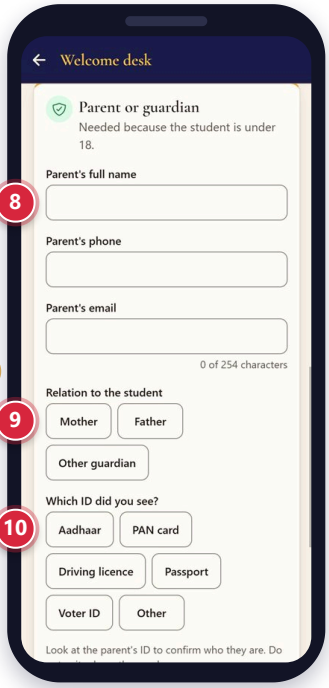

Two steps, about two minutes. For a sign-up, **fill the form** puts in what they typed; check every field with the person.

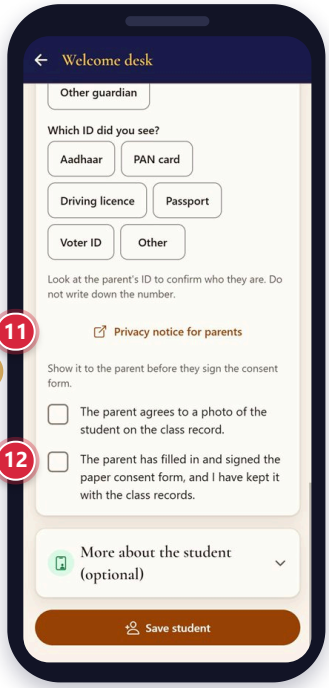

Step 1: 1 from the sign-up. 2 Name as on the ID. 3 Date of birth. 4 Phone, email. **Next: more details**.

Step 2: area, pincode, interests, 5 gender, 6 **Mentor coordinator**. 7 **Save student**.

Under 18: 8 the parent's name, phone, email. 9 Relation. 10 The ID you saw.

11 Show the **Privacy notice for parents**. 12 Tick: the parent signed the paper form.

Never write down an ID number. The parent's paper consent form stays with the class records. **More about the student (optional)** holds the About-you questions; the student can also fill them in later.

If something goes wrong

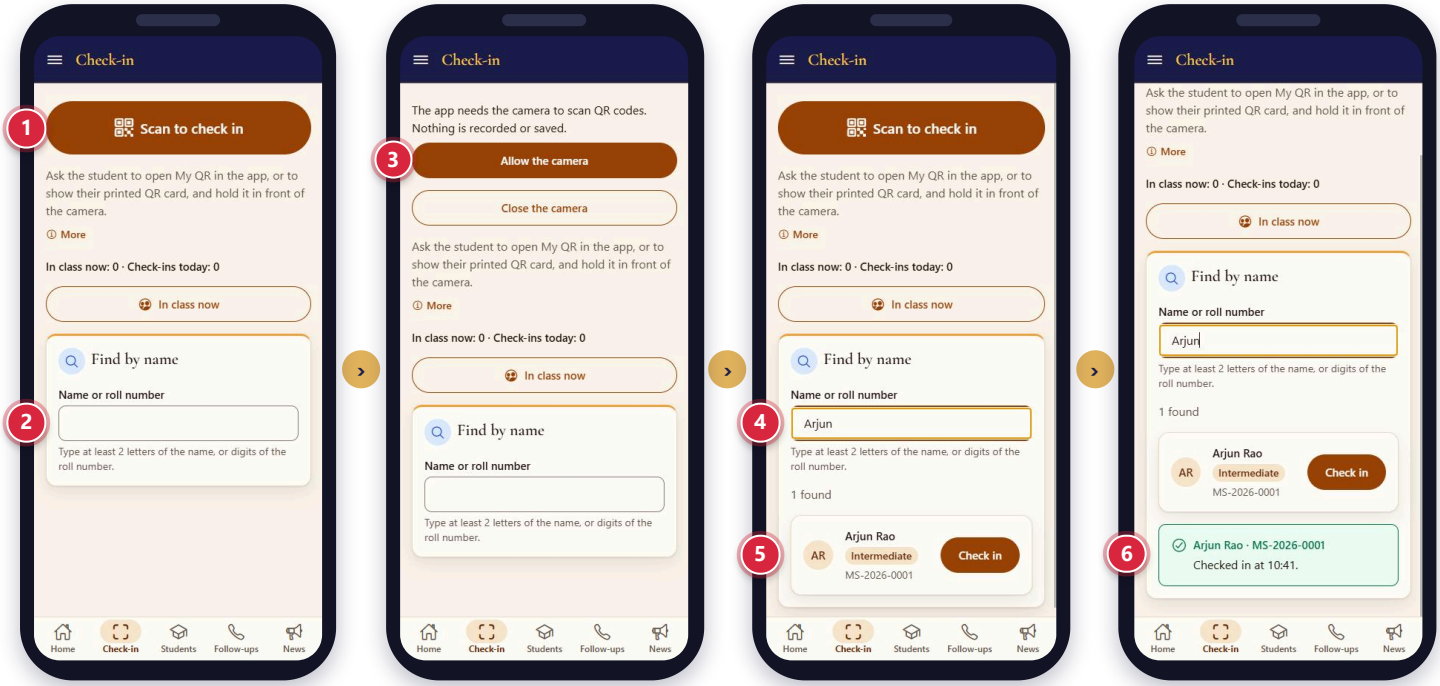

- A red message under a box: correct that box (names take letters only), then **Save student** again. The app goes to the first box with a problem.
- "Possible duplicate": the person may already be registered. Open the record before saving a second one.
- Saved twice by mistake (a lost answer): the app keeps the student once and says so.

5 · EVERY CLASS

Check students in at the door

For: The coordinator at the door.

Students show **My QR** on their phone or a printed QR card. No phone and no card? Find the name.

1 The **Check-in** tab: **Scan to check in**. 2 Or **Find by name**.

3 The first time: **Allow the camera**. Hold the code in front of it.

4 Two letters of the name or digits of the roll number. 5 **Check in**.

6 Green: **Checked in at** and the time. Scan again when they leave: **checked out**.

No internet? Keep going. The app says **No connection: saved on this phone** and sends the check-ins by itself when the signal is back. Keep the app open and do not sign out until they are sent.

If something goes wrong

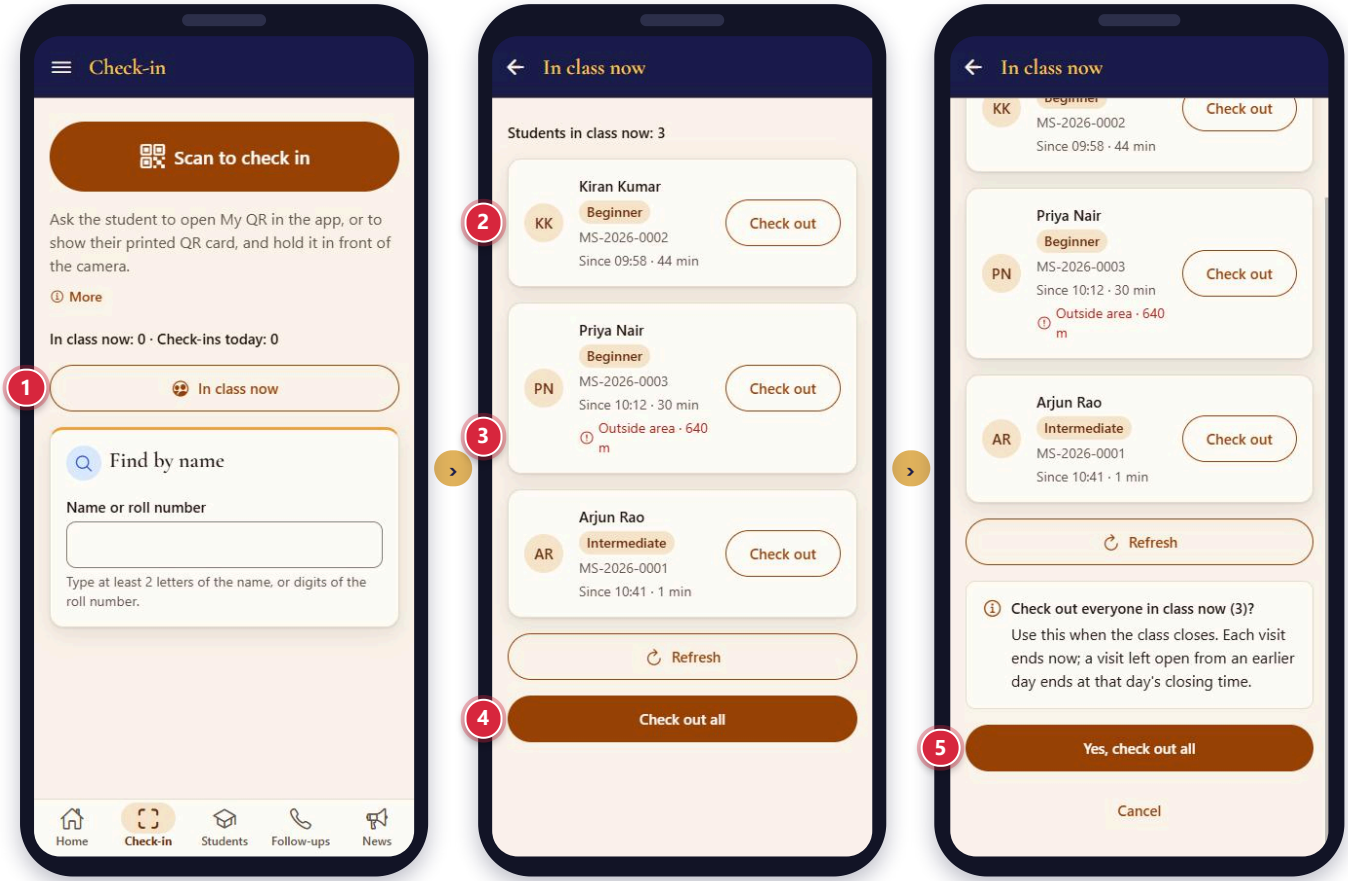

- "Already checked in": the code was scanned twice within 30 seconds. Nothing changed.
- A red **Outside area** line: the phone was outside the centre's area or gave no location. The visit is saved; the Guru sees the flag.
- A printed card "not recognised": it was replaced by a new one. Use My QR or print a new card (page 21).

6 · EVERY CLASS

Who is in class, and Check out all

For: The coordinator closing the class.

See who is in the hall now, check one student out, or everyone at closing time.

1 Check-in tab → **In class now** (or the box on Home).

2 **Check out** one student. 3 A flagged check-in. 4 **Check out all**.

5 **Yes, check out all**. Each visit ends now.

A visit left open from an earlier day ends at that day's closing time. When the Guru has switched on emails to parents, a child's parent gets an email at check-out.

If something goes wrong

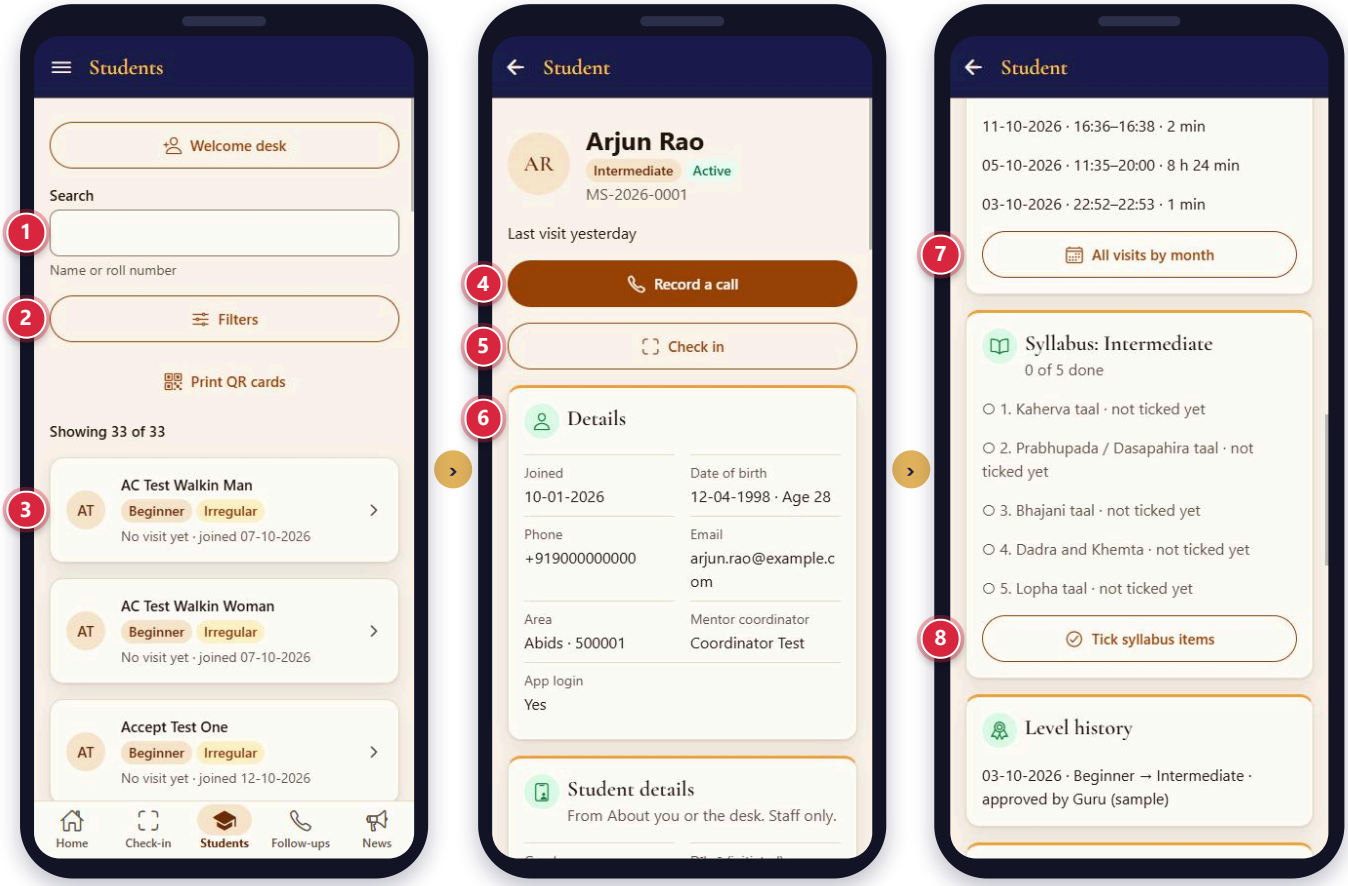

- Nobody listed but students are in the hall: they were not checked in. Check them in now from the Check-in tab.
- The list looks old: tap **Refresh**.

7 · STUDENTS

Find a student and open the student page

For: Every coordinator.

The Students tab lists everyone in the class. A student's page holds the details, calls, visits, syllabus and level-up check.

1 Search by name or roll number. 2 **Filters**: level, status, mentor, last visit. 3 Tap a student.

4 **Record a call**. 5 **Check in** from here. 6 **Details**: phone, email, mentor.

Further down: 7 **All visits by month**. 8 **Tick syllabus items** (page 11).

Statuses: **New**, **Active**, **Irregular** (no visit for a while), **Inactive**, **Paused**, **Left**. Irregular and Inactive students appear in Follow-ups for a call (page 12). **Edit these details** changes the About-you answers.

If something goes wrong

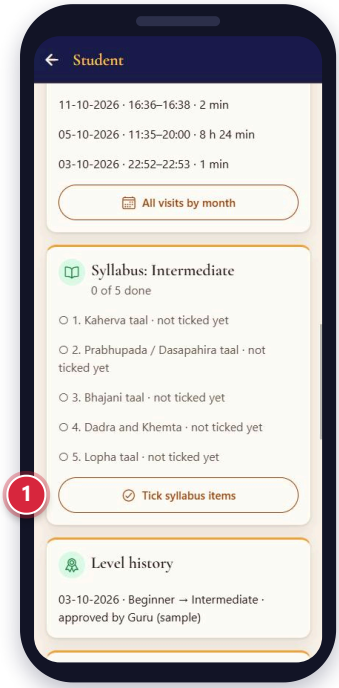

- Parents' details hidden ("Private details need your sign-in code"): set up your code (page 4).
- A wrong name or date of birth: correct it with the student present and the ID seen; ask the Guru if you cannot change it.

8 · TEACHING

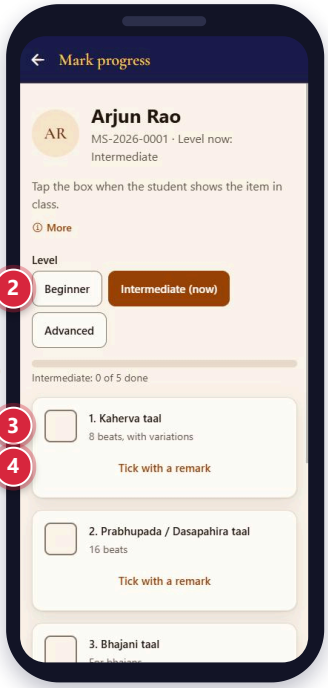

Mark progress: tick the syllabus

For: Coordinators who teach in class.

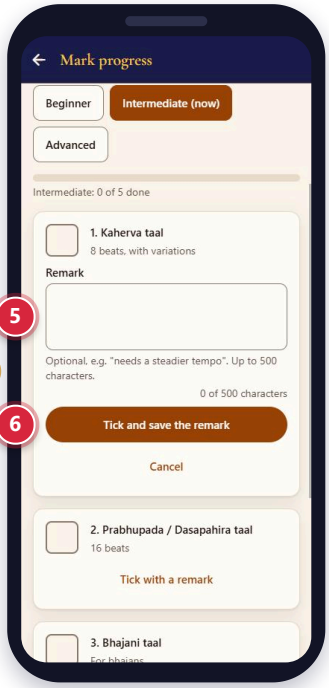

When a student shows an item of their level in class, tick it. The tick carries the date and your name; the student sees it in My progress.

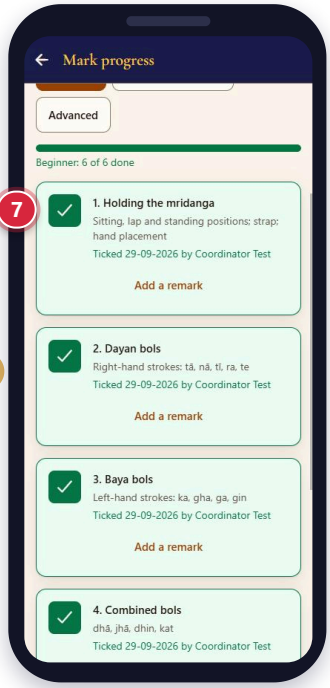

1 On the student page: **Tick syllabus items**.

2 The level (now). 3 Tap the box when the item is shown. 4 **Tick with a remark**.

5 A remark, e.g. "needs a steadier tempo". 6 **Tick and save the remark**.

7 Ticked: date and name. **Add a remark** later.

When every item of the level is ticked, the app says the level is complete. Moving up is the Guru's decision: recommend the student (page 17).

If something goes wrong

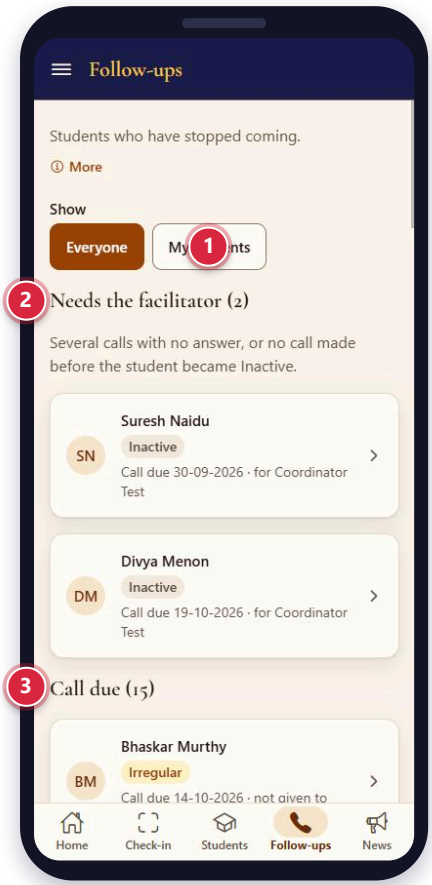

- Ticked by mistake: tap the box again; the app asks before it takes the tick away.
- The level shown is wrong: only the Guru changes a student's level.

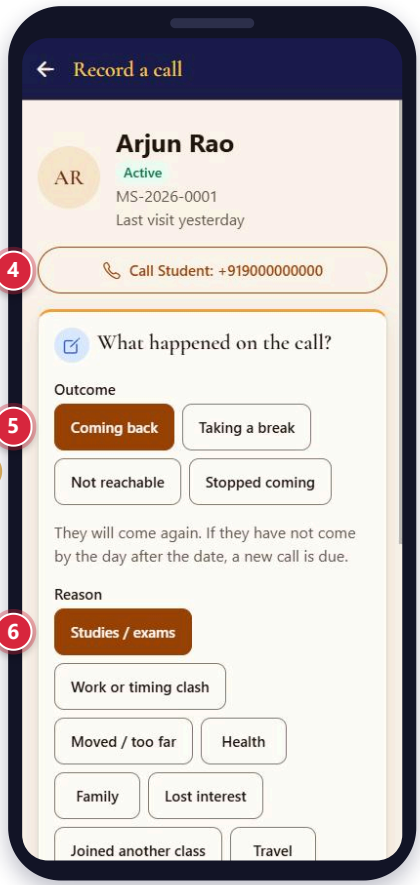

9 · STUDENTS

Follow-ups: call a student who stopped coming

For: The mentor coordinator of each student.

Students who have not come for a while appear in **Follow-ups**. Call them kindly, then record what was said, so whoever calls next knows.

1 **Everyone** or **My students**. 2 **Needs the facilitator**. 3 **Call due**: tap a name.

4 **Call Student** (or the parent). 5 **Outcome**. 6 **Reason**.

7 **Expected on**. 8 **What was said** (needed). 9 **Save**.

Coming back: if they have not come by the day after that date, a new call is due. **Stopped coming** asks once more; the login and messages go on until the Guru switches the login off.

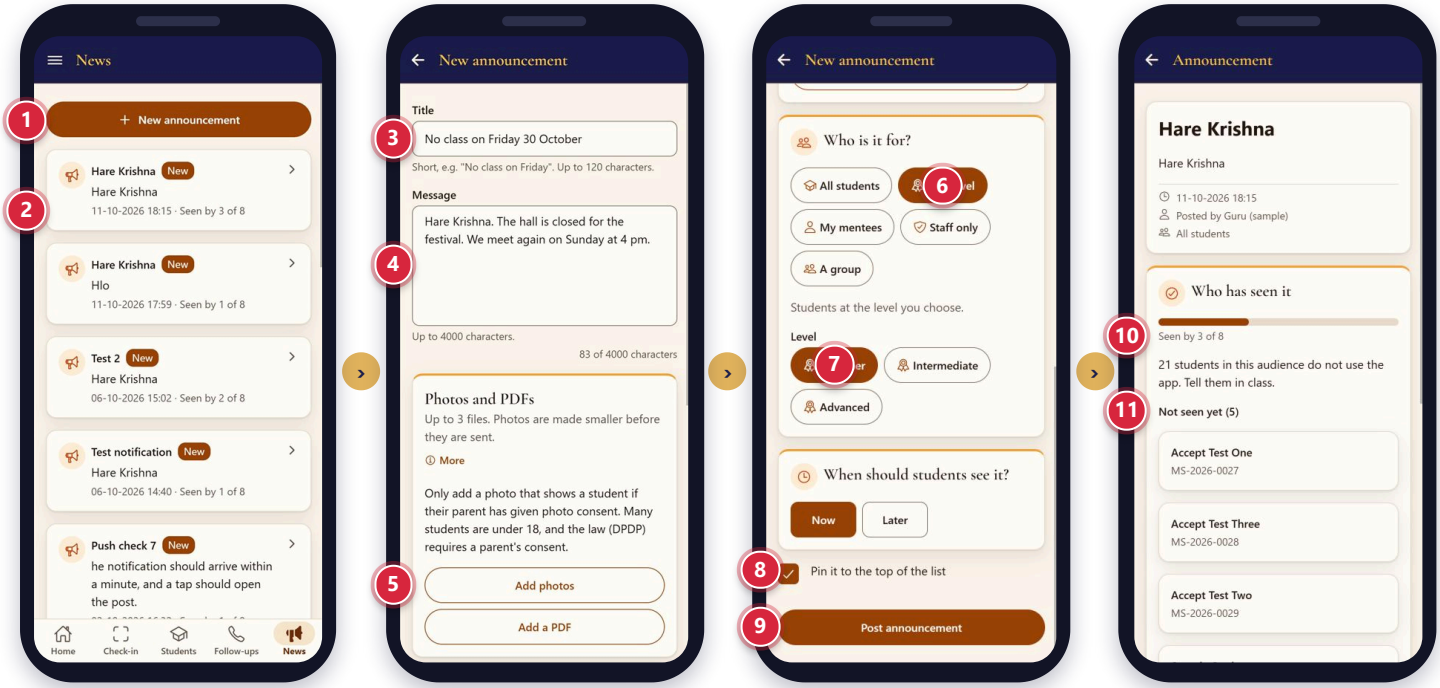

If something goes wrong

- "No phone number on the record": add it on the student page, or ask in class.
- "Some fields need a fix": fill **What was said** and the outcome, then **Save** again.
- Several calls with no answer move the student to **Needs the facilitator**.

Post an announcement

For: Every coordinator.

News reaches the whole class, one level, your mentees, the staff or a group. Students see it in their News tab; Android phones also get a notification.

1 News tab → **New announcement**. 2 Each post shows **Seen by**.

3 **Title**. 4 **Message**. 5 **Add photos** or **Add a PDF** (up to 3).

6 **Who is it for?** 7 The level. 8 **Pin it to the top of the list**. 9 **Post announcement**.

10 **Seen by** 3 of 8. 11 **Not seen yet**: tell them in class.

Later posts it at a time you choose. A photo that shows a student needs the parent's photo consent. Students can reply privately; only the author and the facilitator see replies.

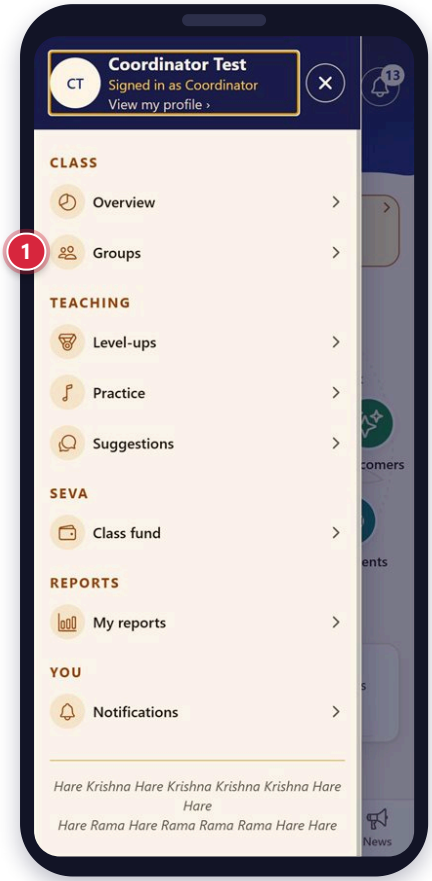

If something goes wrong

- "Students in this audience do not use the app": tell them in class.
- To change a post: open it and edit it (the author or the Guru). Students see **Edited**.

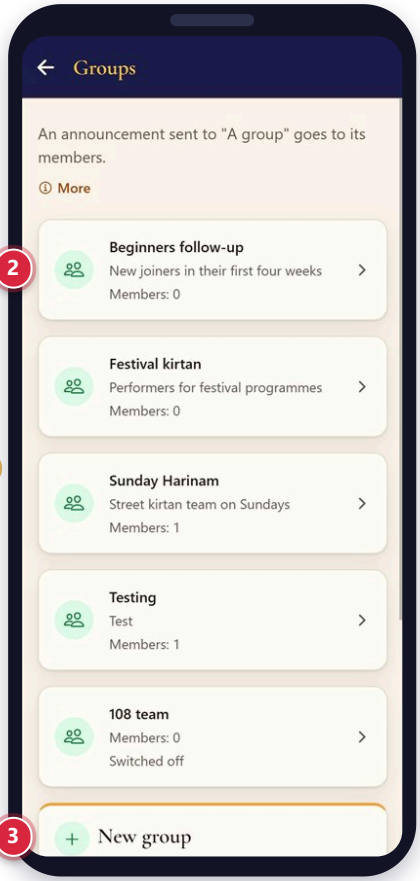

Groups for announcements

For: Coordinators who post to a team, for example the festival performers.

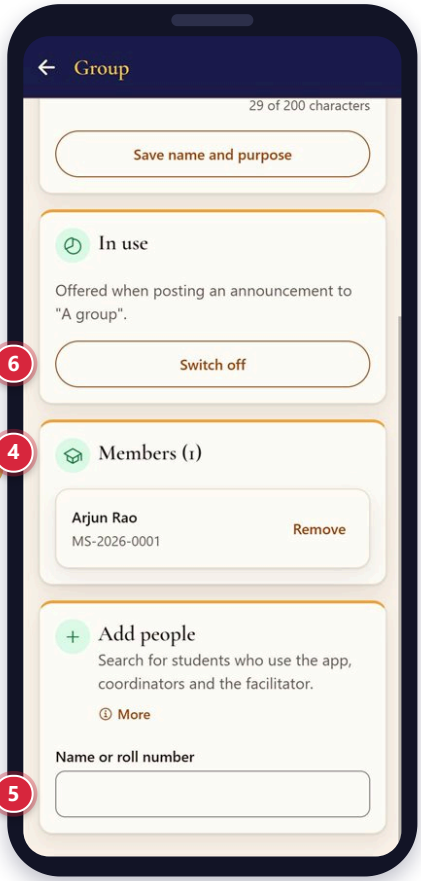

A group is a list of people. An announcement sent to **A group** reaches only its members.

1 Menu → **Groups**.

2 Tap a group. 3 At the foot: **New group**, a name and what it is for, **Create group**.

4 **Members**, **Remove**. 5 **Add people**: search a name. 6 **Switch off** when not needed.

Students who use the app, coordinators and the facilitator can be members. Then post the news with **Who is it for?** → **A group** (page 13).

If something goes wrong

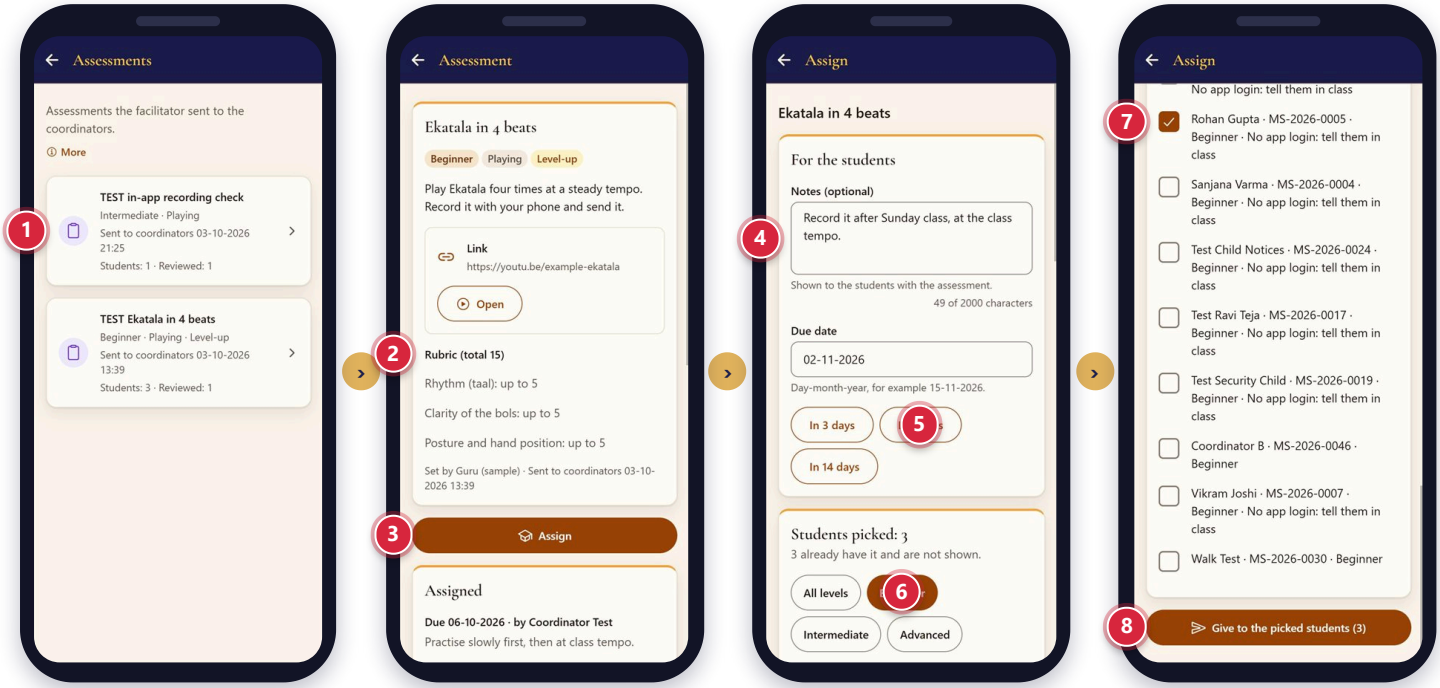

- A student cannot be found to add: they have no app login yet. Tell them in class.
- A switched-off group is not offered when posting.

12 · TEACHING

Give an assessment to students

For: Coordinators. The Guru writes the assessments; coordinators give them to students.

An assessment is a short task, for example "Play Ekatala four times". Students record it and send it; you review it (page 16).

1 Home → **Assessments**: tap one.

2 The task and how marks are given. 3 **Assign**.

4 Notes for the students. 5 Due date: **In 7 days**. 6 Pick a level.

7 Tick the students. 8 **Give to the picked students**.

Students who already have it are not shown. "No app login: tell them in class": they cannot send a recording from the app.

If something goes wrong

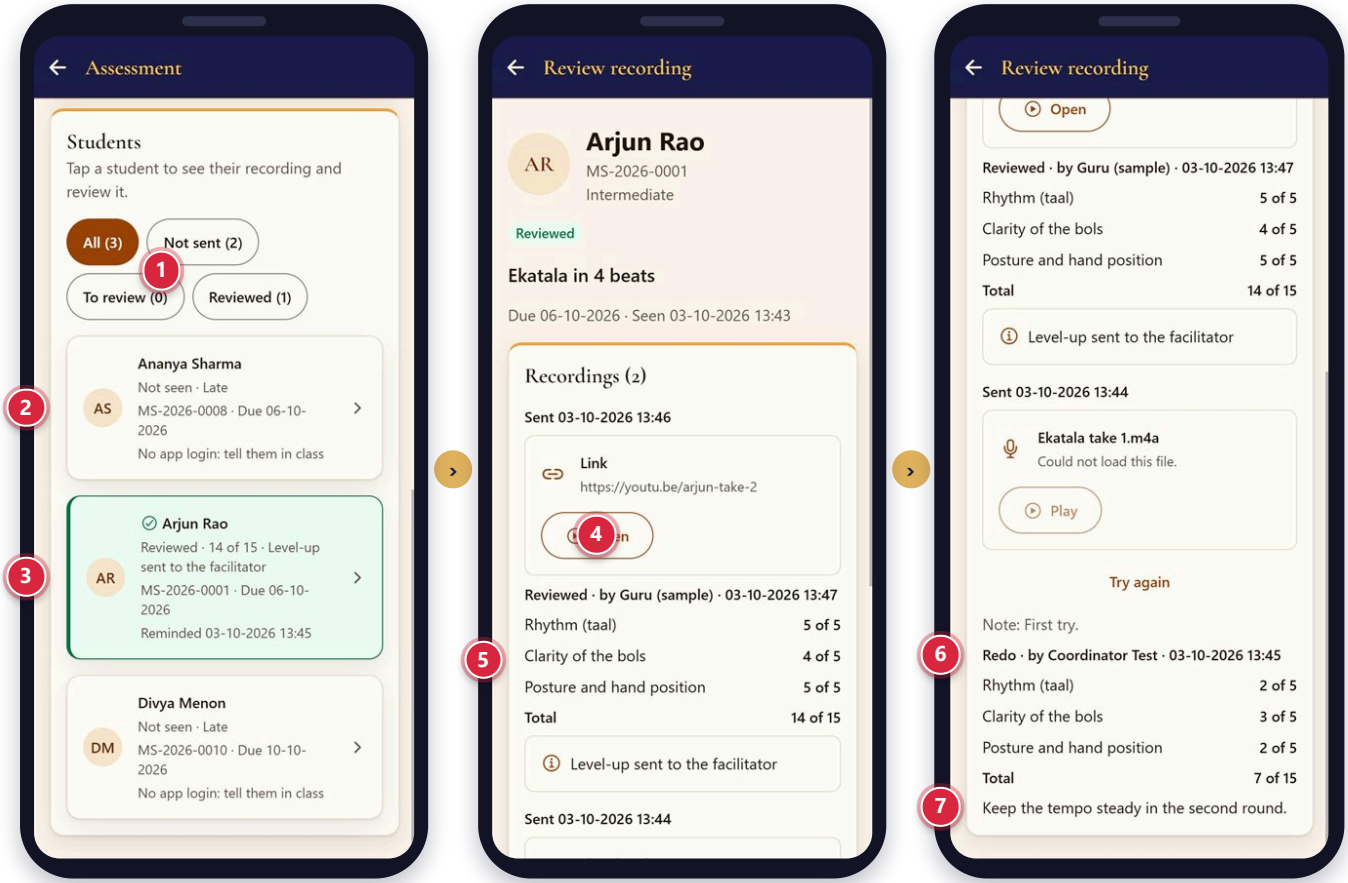

- An assessment is missing from the list: the Guru has not sent it to the coordinators yet.
- A student is not in the list: check the level chip, or search by name.

13 · TEACHING

Follow an assessment and review recordings

For: Coordinators who gave an assessment.

The assessment page shows each student: **Not seen**, **Seen**, **Submitted**, **Reviewed**, **Redo**, **Late**. Open a student to listen and review.

1 **Not sent**, **To review**, **Reviewed**. 2 Late, no app. 3 Reviewed: 14 of 15.

4 **Open** the recording or link. 5 The score per line and the total.

6 An earlier take with **Redo**. 7 The comment the student read.

To review a sent recording: give a score per line, write a comment or record a voice note (up to 5 minutes), then **Accept** or **Ask for a redo** (a redo needs a comment or a voice note). On a level-up assessment, **Send level-up to the facilitator**. Reminders go out by themselves at 09:00 the day before and on the due day.

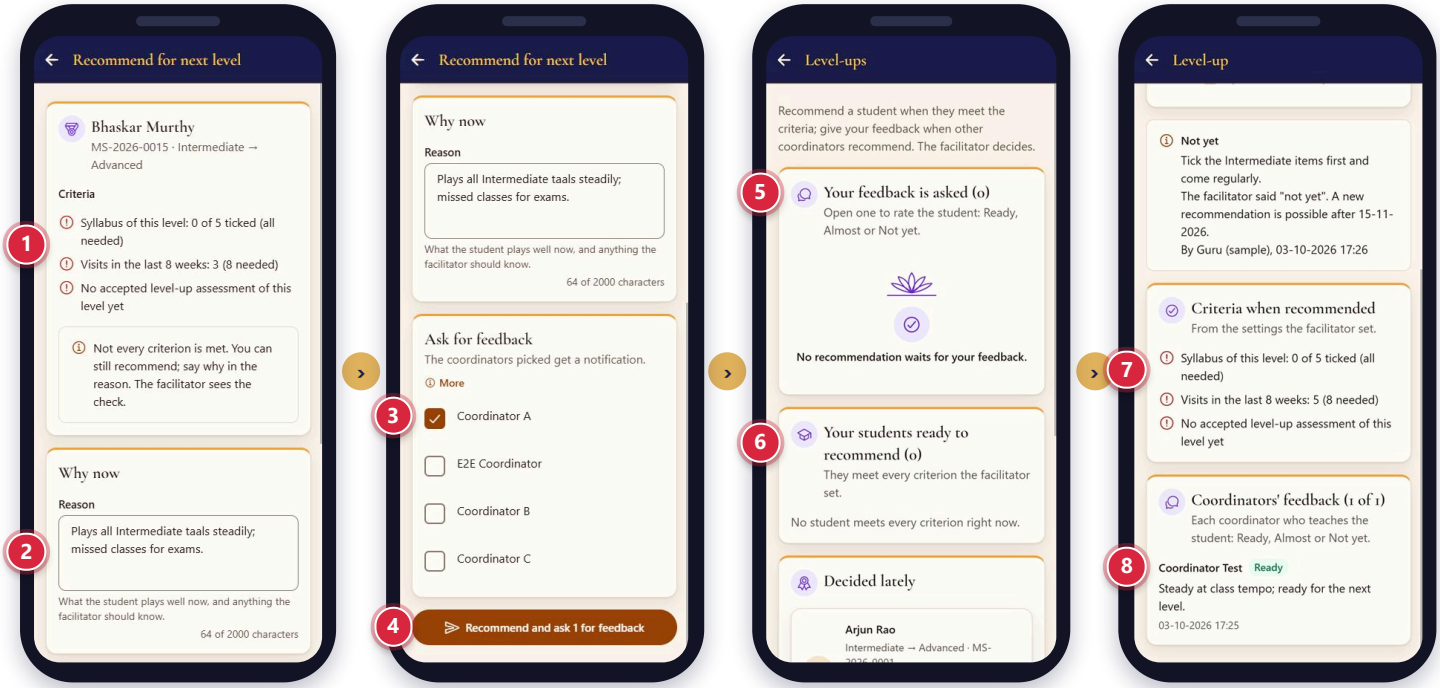

If something goes wrong

- "Could not load this file": tap **Try again**; check the internet. Recordings are deleted 30 days after the review; the marks stay.
- Nothing sent yet: **Remind everyone who has not sent it** (students with the app only).

Level-ups: recommend a student, give feedback

For: Coordinators. The Guru decides every level-up.

When a student is ready for the next level, recommend them. Other coordinators who teach them give feedback: **Ready**, **Almost** or **Not yet**.

Student page → **Level-up**: 1 the criteria. 2 **Reason**.

3 Tick the coordinators to ask. 4 **Recommend and ask 1 for feedback**.

Menu → **Level-ups**: 5 **Your feedback is asked**. 6 Your students ready.

7 The criteria when recommended. 8 Each coordinator's answer.

Criteria: the whole syllabus of the level ticked, 8 or more visits in 8 weeks, and an accepted level-up assessment. The Guru sees the check, the reason and every answer, then decides.

If something goes wrong

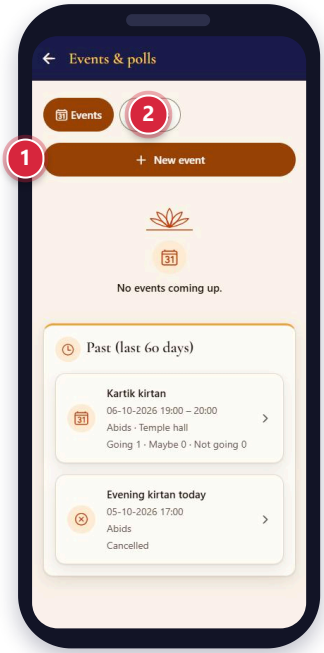

- After a "not yet" the student page shows the date a new recommendation is possible.
- Asked for feedback: open it from Level-ups and choose **Ready**, **Almost** or **Not yet** with a comment; you can change it while it is open.

15 · STAYING IN TOUCH

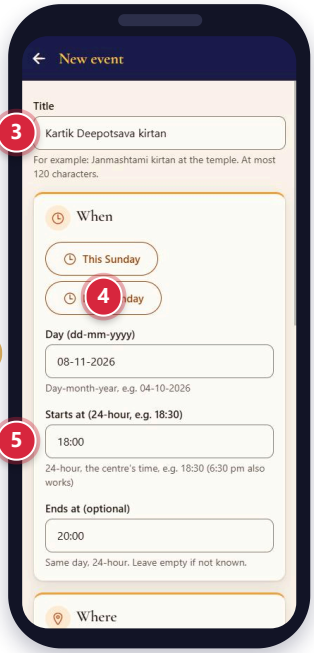

Events and polls

For: Coordinators who plan a programme or ask the class a question.

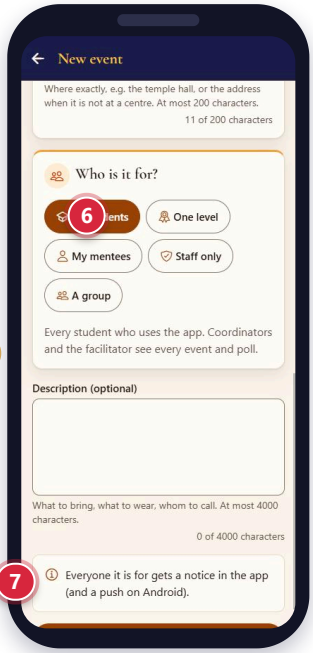

An event collects Going / Maybe / Not going; a poll asks one quick question.

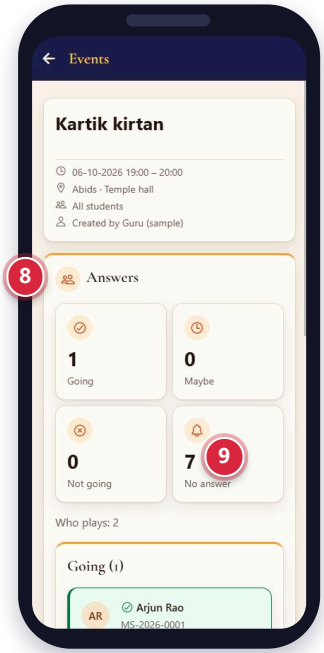

1 Home → **Events & polls** → **New event**. 2 The **Polls** tab.

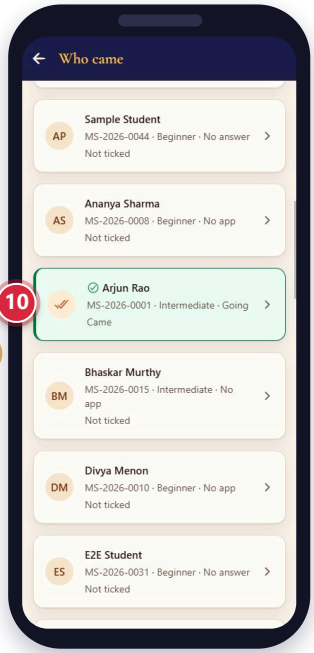

3 **Title**. 4 **Next Sunday** or a day. 5 **Starts at**.

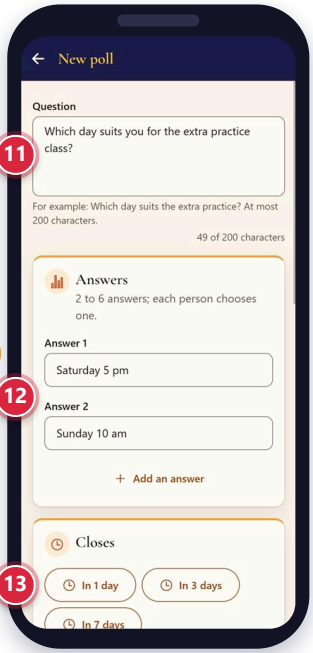

6 **Who is it for?** 7 Then **Create event**.

8 **Answers**. 9 **No answer**: **Remind** them.

Who came: 10 tap each one, **Save**.

New poll: 11 question, 12 answers, 13 **Closes**.

Who plays: pick the performers and their part. **Cancel the event** tells everyone.

If something goes wrong

- Once someone answered, the event's audience and a poll's answers are fixed.

16 · SEVA

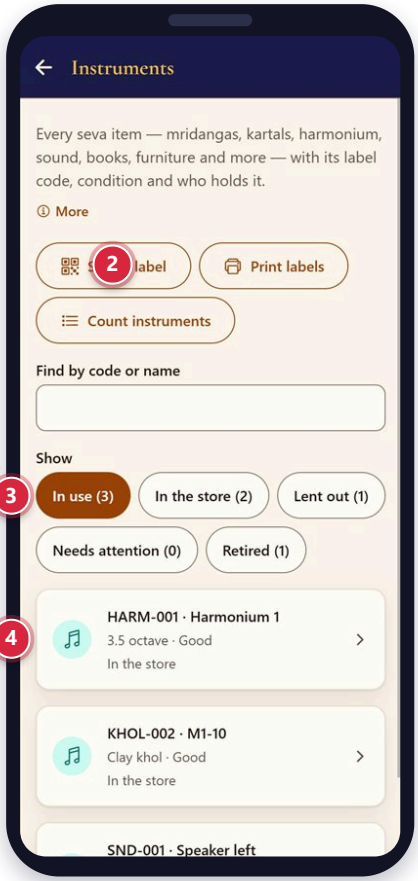

Instruments: lend and take back

For: Coordinators who look after the class's mridangas, kartals and sound.

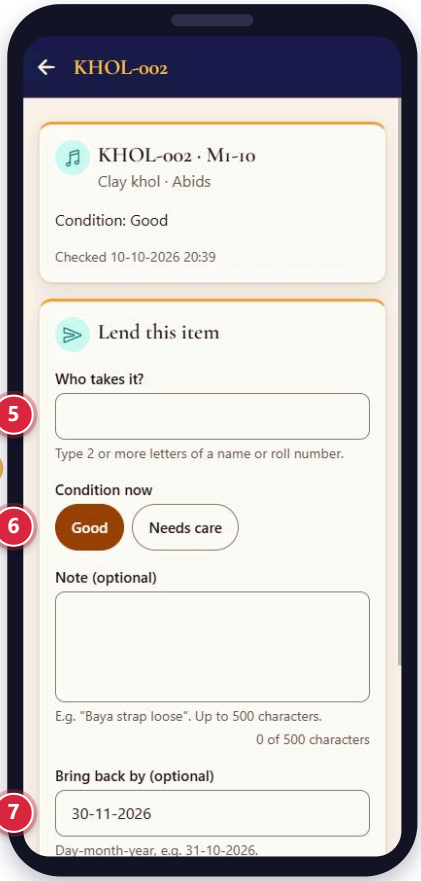

Every item has a label code, for example KHOL-002. The app keeps who holds it, since when, and its condition.

1 Home → **Instruments**.

2 **Scan a label** to open an item. 3 **In use**, **Lent out**, **Needs attention**. 4 Tap an item.

Lend: 5 who takes it, 6 **Condition now**, 7 **Bring back by**. Then **Lend it**.

When it comes back: open the item, **Take back**, note the condition. **Condition check** records a check without lending. **Print labels** and **Count instruments** (a stocktake) are on the same screen.

If something goes wrong

- A label does not scan: type its code in **Find by code or name**.
- "Another centre's item": it belongs to another centre; return it there.

Seva roster and students' practice

For: Every coordinator.

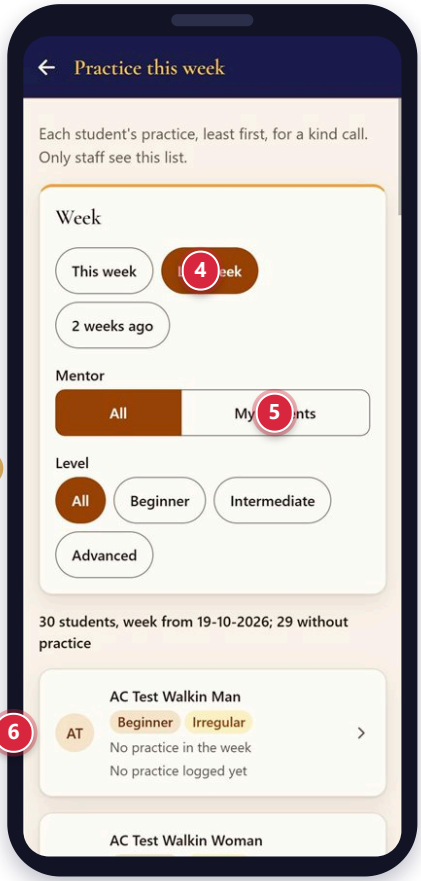

Your duty shifts for the next four weeks, and a kind look at how much each student practised.

1 Home → **Seva roster**.

2 **My shifts**. 3 **Roster, next 4 weeks**: who is on duty.

Menu → **Practice** → **Students' practice this week**: 4 the week, 5 **My students**, 6 least first.

A reminder comes the evening before your shift (18:00). The Guru plans the shifts. Use the practice list for a kind word or call, never to compare students.

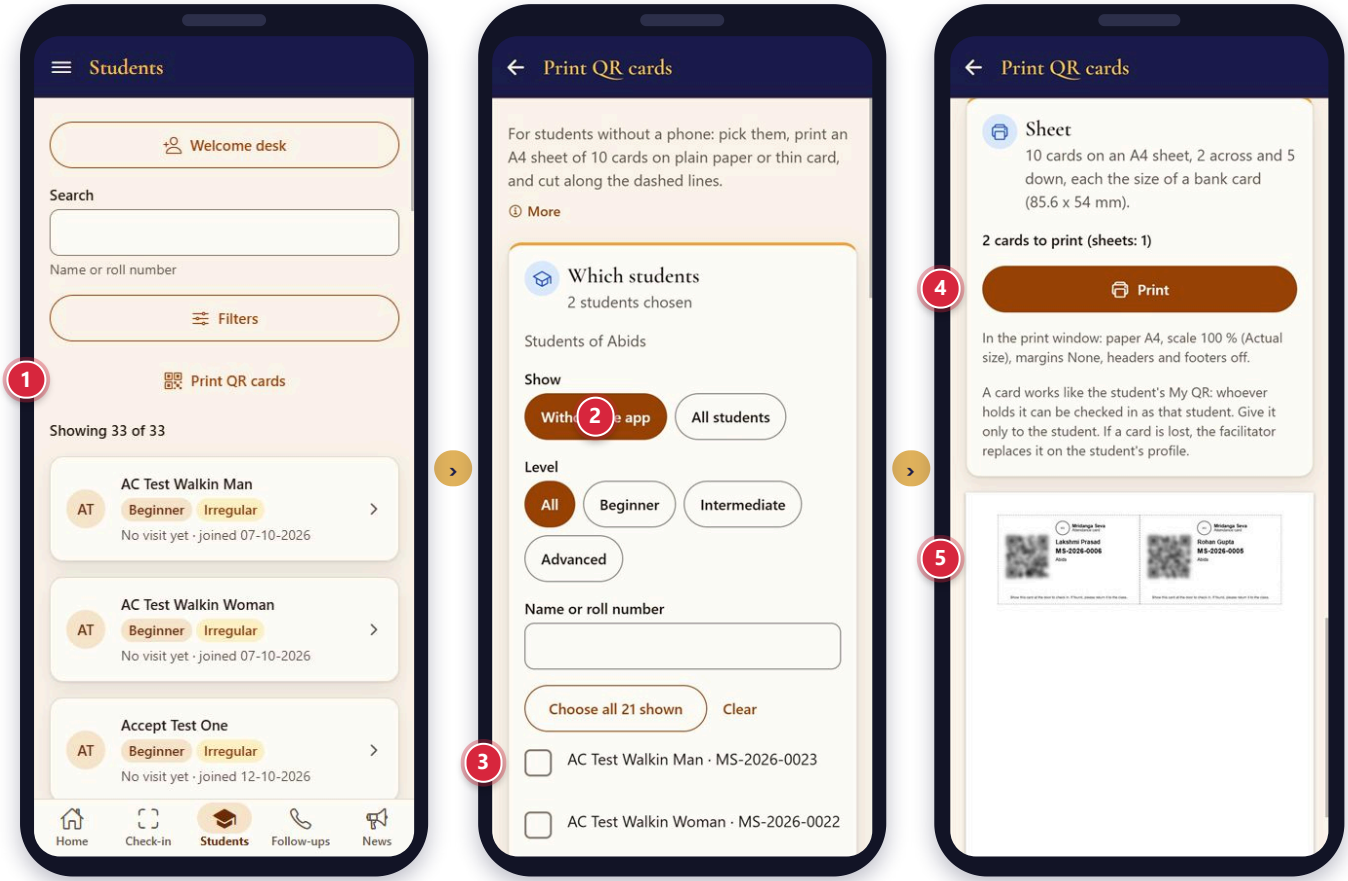

If something goes wrong

- "No shifts planned": the Guru has not added shifts yet.
- "No practice logged yet": the student may practise without logging it. Ask them gently.

Print QR cards for students without a phone

For: Coordinators at the desk (web version on a laptop).

A printed card has the same code as My QR. Ten bank-card size cards fit on one A4 sheet.

1 Students tab → **Print QR cards**.

2 **Without the app** or **All students**.
3 Tick the students.

4 **Print**: A4, scale 100 %, no margins.
5 Cut along the dashed lines. (Codes blurred here.)

Whoever holds a card can be checked in as that student: give it only to the student. A lost card is replaced by the Guru on the student page; the old card then scans as not recognised.

If something goes wrong

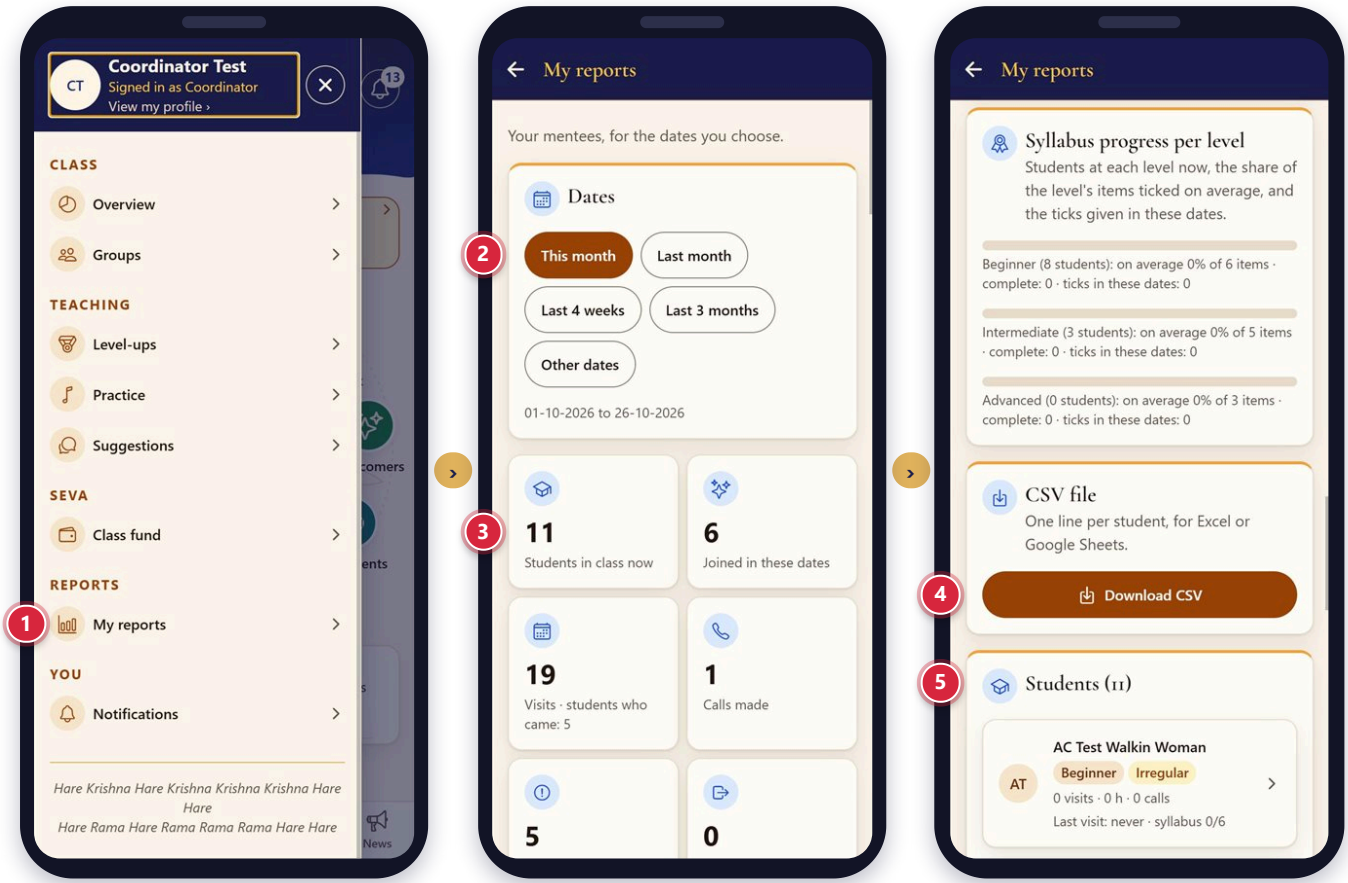

- On a phone the page opens in the browser: print from a laptop or desktop.
- Cards print too small or too big: in the print window choose scale 100 % (Actual size).

19 · REPORTS

My reports

For: Every coordinator, for their own mentees.

How your mentees are doing for the dates you choose: visits, calls, statuses and syllabus progress.

1 Menu → **My reports**.

2 **This month**, **Last month**, **Last 4 weeks** … 3 The numbers: in class, joined, visits, calls.

4 **Download CSV** for Excel or Google Sheets. 5 One line per student; tap to open.

Flagged check-ins in the report counts visits where the phone was outside the area or gave no location. The Guru sees the same report for the whole class.

If something goes wrong

- A student is missing: the report shows only your mentees. Ask the Guru to change the mentor.
- Where the CSV goes: on the web it downloads like any file; in the Android app choose a folder or share it.

COORDINATOR GUIDE

Quick help

Most problems have a simple fix. If none of these helps, ask the Guru.

What happened	What to do
No internet at the door	Keep checking in: the check-ins are saved on the phone and sent when the signal is back. Do not sign out meanwhile (page 8).
I forgot my password	Sign-in screen → **Forgot password?** → your email → **Send link**.
Lost or changed my phone (sign-in code)	Ask the Guru to reset your code, then set it up again (page 4).
A sign-up does not appear at the desk	**Refresh list**. The person must open the email link first; a child needs the parent's email consent.
Two records for one person	Do not register again. Tell the Guru; the Guru can remove a record entered by mistake.
A student forgot to check out	**In class now** → **Check out**, or **Check out all** at closing time (page 9).
Parents' details are hidden	Set up your sign-in code in My profile (page 4).
The app looks different from these pictures	Your app may be newer. **My profile** → **What's new** shows what changed.

> Who to ask: the Guru (the facilitator). Privacy questions: **My profile** → **See my data and rights** → **Who to contact**.
