Guru guide

Setting up and guiding the class with the app, step by step, with pictures

For the Guru (the facilitator; the app says "Facilitator"). The pictures come from the test copy of the app with made-up students; staff names are hidden, and a few lists were filled with sample rows for the picture. Nothing was saved. Phase 3 of the guides, after the student guide and the coordinator guide.

What is in this guide

	The Guru area at a glance	3
1	The menu: where the Guru's screens are	4
2	Make a coordinator from a waiting login	5
3	A coordinator's page: duty hours, roles and mentees	6
4	All students, and the Excel import	7
5	A student's record: mentor, level, delete a mistake	8
6	Levels, syllabus and lessons	9
7	Decide a level-up	10
8	Write an assessment for the coordinators	11
9	Overview, reports and how students found us	12
10	Settings, and emails to parents	13
11	Sign-in codes: who has one, reset a lost one	14
12	Data requests: copy, correction, erasure, withdrawal	15
13	App errors and the change history	16
14	Centres and form choices	17
15	The class fund	18
16	Plan the Seva roster	19
17	Ishtagoshti: slokas and themes	20
	Quick help	21

How to read this guide

One page, one job

Each page shows one thing you do, for example "Decide a level-up". Read the title, then follow the numbers.

Red numbers

A red circle on a picture marks where to tap or look. The same number under the picture tells you what to do there. The arrows show the order of the screens.

Words in bold

Bold words are written exactly as the app shows them, so you can find the button.

Shared with coordinators

Desk, check-in, students, calls, news, events and instruments work as in the **coordinator guide**. This guide shows only the Guru's extra work.

Changes you cannot undo

Erase, Withdraw, Delete, Reset and the switches cannot be taken back. The pictures stop before the last tap; it is written in words.

Android app or web

The screens are the same in the Android app and on the web. Set-up work is easier on a laptop.

START HERE

The Guru area at a glance

The Guru (facilitator). Sign in as the coordinators do: coordinator guide, page 4.

After you sign in, the app opens on **Home**. Everything starts from the menu button, the three boxes, the circles around the drum and the five tabs.

Home

1	The menu: **Class**, **Teaching**, **Seva**, **Reports**, **Set-up** and **View my profile**	**4, 14, 16**
2	The bell: **Notifications**	
3	**in class now**, **this week** and **to do**: data requests, level-ups to decide and calls that need you	**15, 10**
4	**Overview**: the whole class in numbers	**12**
5	**Level-ups**: decide who moves up	**10**
6	**Assessments**: write them for the coordinators	**11**
7	**Lessons**: the syllabus of each level and its lessons	**9**
8	**Events & polls**: as in the coordinator guide, page 18	
9	**Ishtagoshti**: slokas and themes	**20**
10	**Welcome desk** and 11 **Newcomers**: as in the coordinator guide, pages 6-7	
12	Tabs **Home**, **Check-in**, **Students**, **Follow-ups**, **News**: coordinator guide, pages 8-13	

Sign-in codes and **App errors** are at the foot of the menu's **Set-up** group, below Form choices (pages 14 and 16).

1 · GETTING STARTED

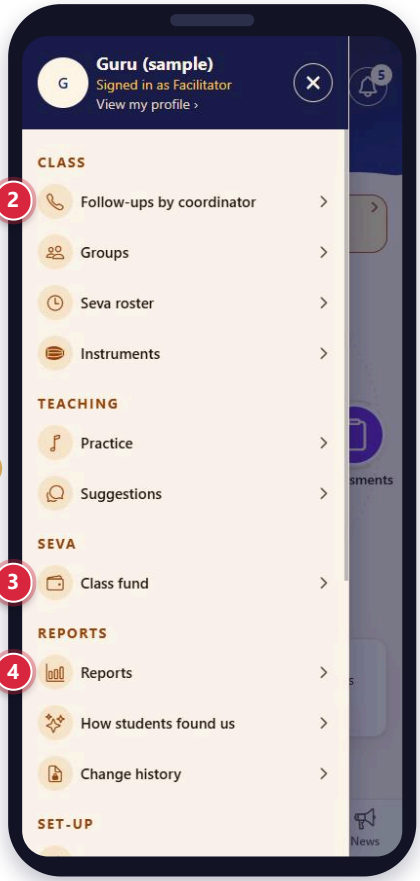

The menu: where the Guru's screens are

For: The Guru.

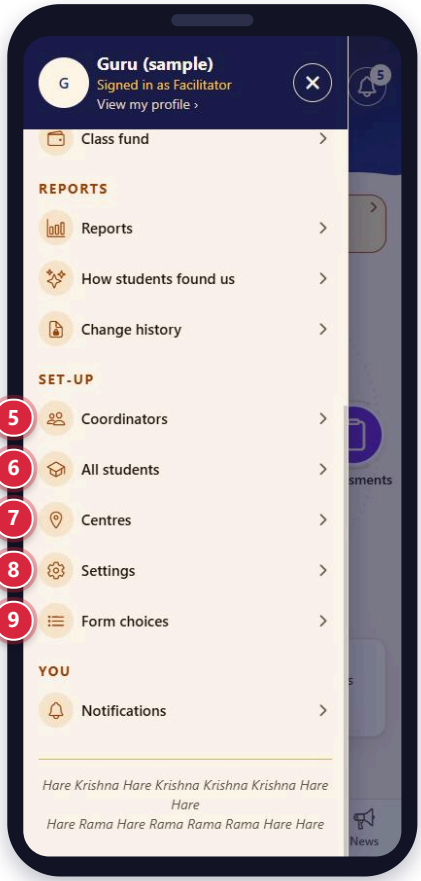

Most Guru work starts in the menu. The **Set-up** group is only for you: coordinators do not see it.

1 On Home, tap the menu button.

2 **Follow-ups by coordinator**. 3 **Class fund**. 4 Reports: **Reports**, **How students found us**, **Change history**.

Set-up: 5 **Coordinators**, 6 **All students**, 7 **Centres**, 8 **Settings**, 9 **Form choices**, then **Sign-in codes** and **App errors**.

Follow-ups by coordinator shows each coordinator's calls that are late or passed to you, and opens their list. The bell and **Notifications** tell you when a data request or a level-up waits.

If something goes wrong

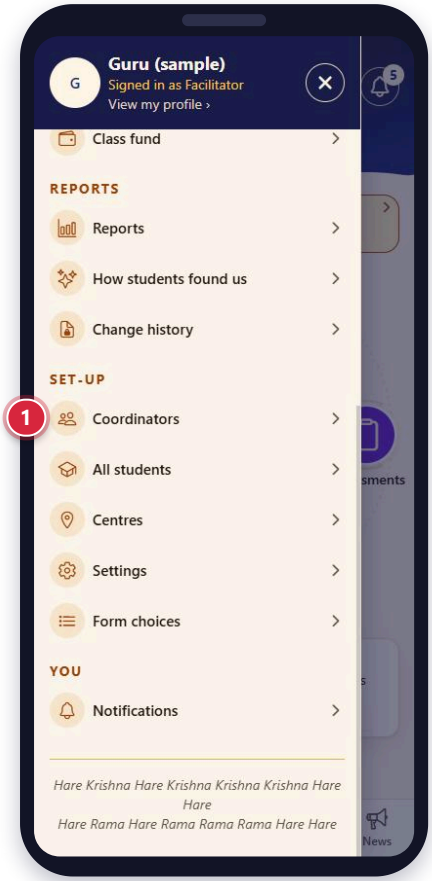

- The menu shows fewer groups: you are signed in as a coordinator, not as the Guru. Sign out and in with the Guru's login.
- Sign-in codes and App errors are missing: the app is older than this guide. Update it (web: reload the page).

2 · SET-UP

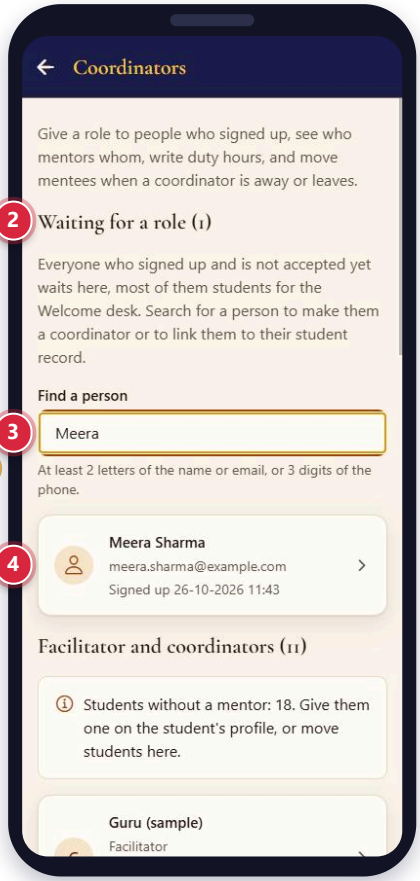

Make a coordinator from a waiting login

For: The Guru, when a new helper has made an account in the app.

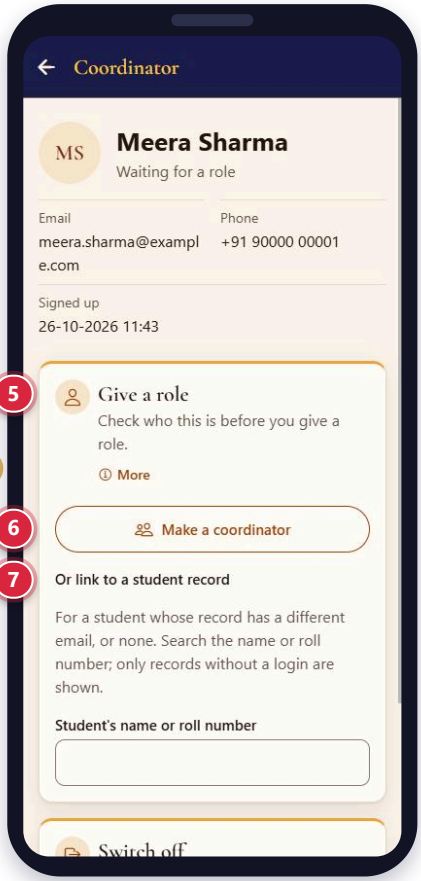

The helper signs up in the app like a student. Their login then waits in **Coordinators** until you give it a role.

1 Menu → **Coordinators**.

2 **Waiting for a role**. 3 **Find a person**: name, email or phone. 4 Tap the person.

5 Check who this is. 6 **Make a coordinator**. 7 A student instead? **Or link to a student record**.

The last step: tap **Make a coordinator** and confirm. From then on the person sees the coordinator Home. Give them the coordinator guide, and ask them to set up a sign-in code (coordinator guide, page 4).

If something goes wrong

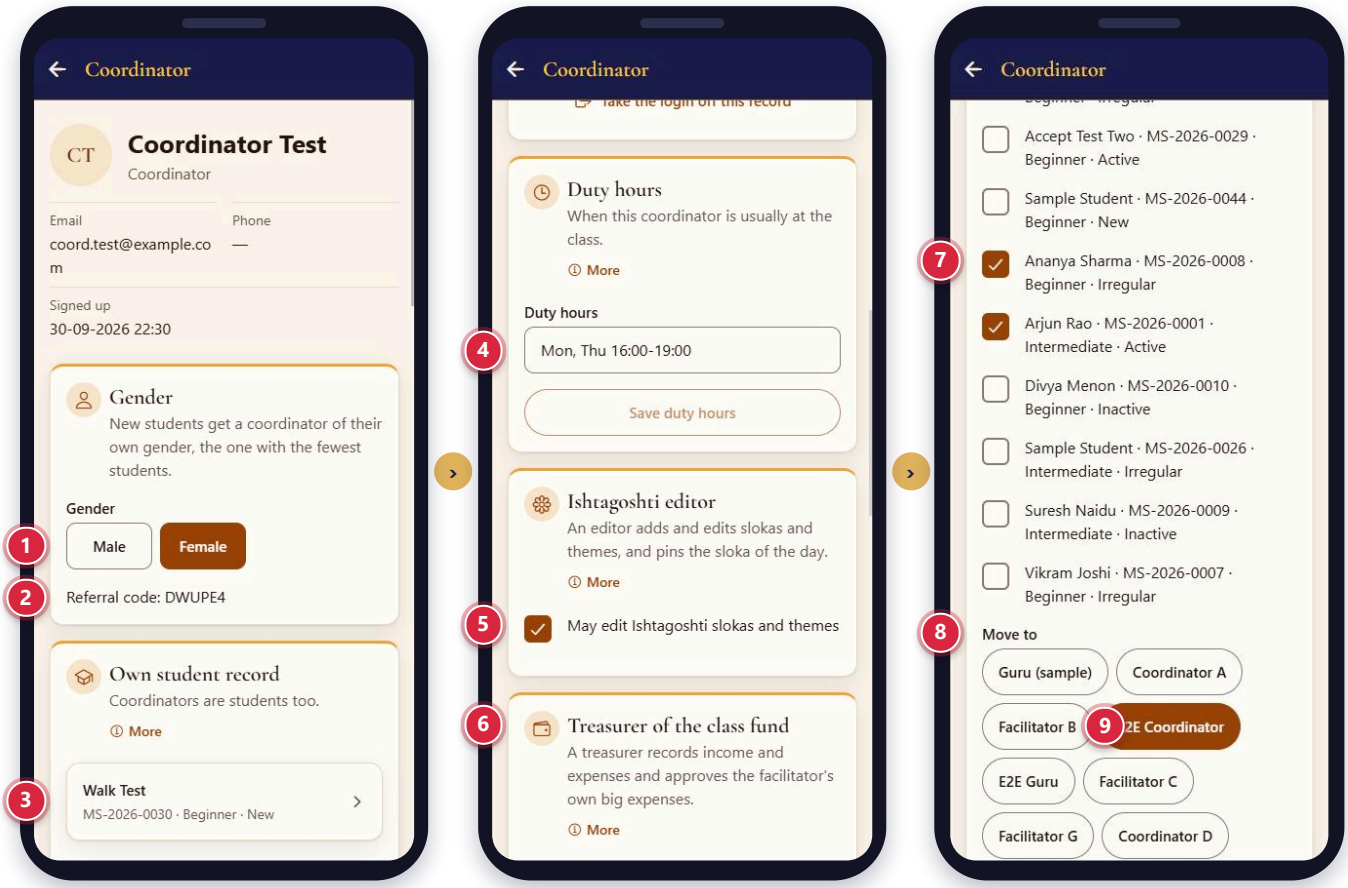

- The person is not in the list: they have not signed up yet, or they are an Ishtagoshti member (they join from Ishtagoshti, not here).
- A student whose record has a different email: use **Or link to a student record** instead, never make a second record.

3 · SET-UP

A coordinator's page: duty hours, roles and mentees

For: The Guru.

Tap a coordinator in **Coordinators**. Their page holds their details, what they may do, and the students they mentor.

1 **Gender** (new students get a mentor of their gender). 2 **Referral code**. 3 **Own student record**.

4 **Duty hours**, then **Save duty hours**. 5 **May edit Ishtagoshti slokas and themes**. 6 **Treasurer of the class fund**.

Mentees: 7 tick students, 8 **Move to**, 9 pick a coordinator. Then **Move the picked students**.

When a coordinator leaves: move all their mentees first, then **Switch off** at the foot of the page. A switched-off login can still sign in but sees nothing. Every change asks first and is kept in the **Change history**.

If something goes wrong

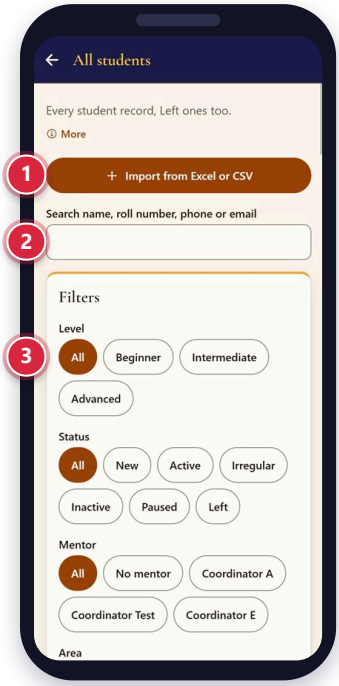

- "This coordinator still mentors … students": move them to someone else first, then switch off.
- **Own student record**: coordinators are students too. Link their login to their record here, so **Me** shows their own progress.

4 · STUDENTS

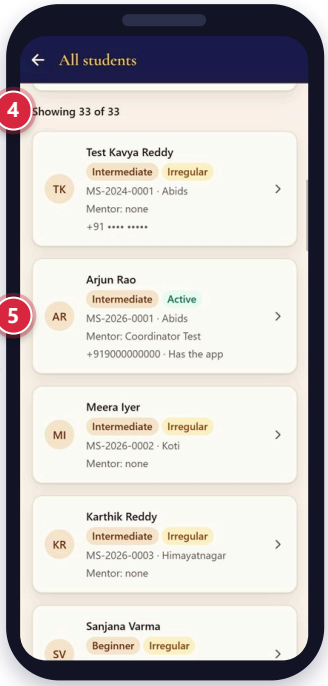

All students, and the Excel import

For: The Guru, usually on a laptop.

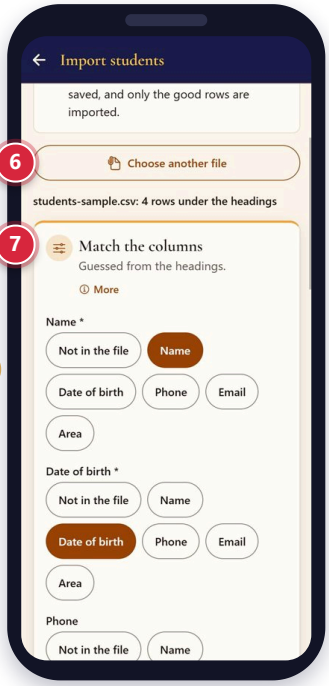

All students lists every record, Left ones too. The import brings in a list of students from an Excel or CSV file.

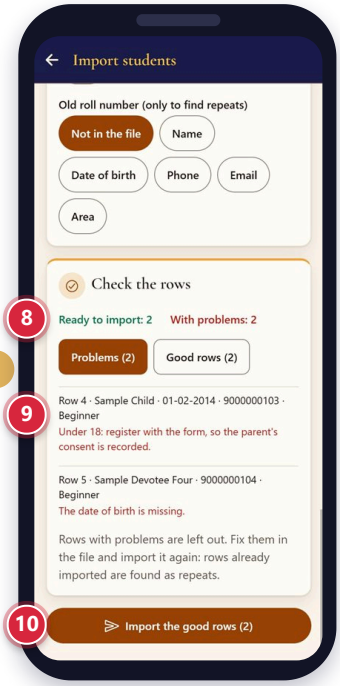

Menu → **All students**: 1 **Import from Excel or CSV**. 2 Search. 3 **Filters**.

4 How many are shown. 5 Tap a student to open the record.

Import: 6 **Choose a file**. 7 **Match the columns** (guessed from the headings).

8 **Ready to import** and **With problems**. 9 The reason. 10 **Import the good rows**.

The file's first row must hold the headings; each row needs a name and a date of birth. Roll numbers are given by the app. Students under 18 are never imported: register them at the desk with the form, so the parent's consent is recorded.

If something goes wrong

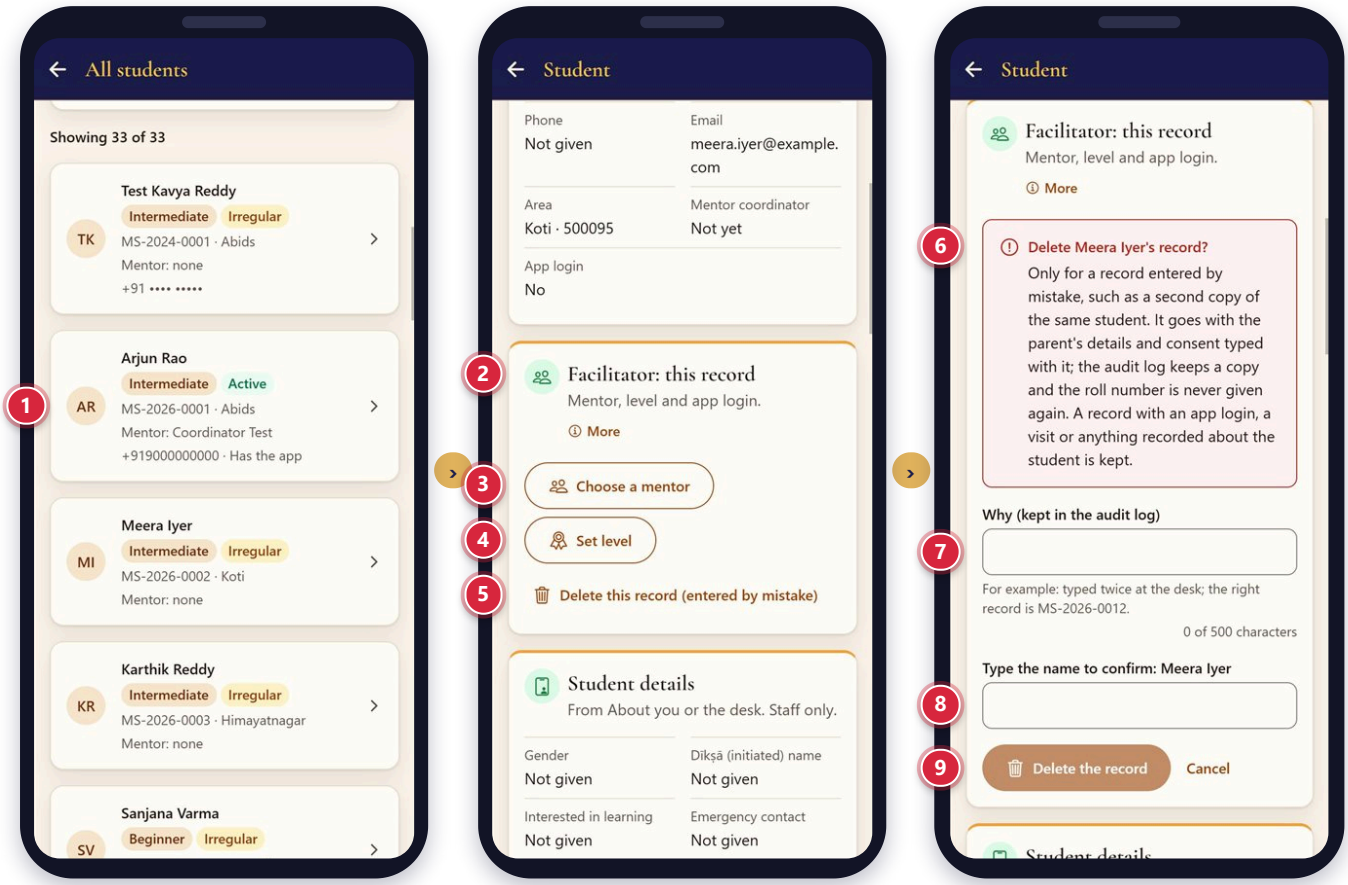

- "The date of birth is missing" or "Under 18": the row is left out. Fix the file and import it again; rows already imported are found as repeats.
- A wrong column: change its chip under **Match the columns** before importing.

5 · STUDENTS

A student's record: mentor, level, delete a mistake

For: The Guru.

On a student's page the Guru has one more box: **Facilitator: this record**.

1 Open the student (All students or the Students tab).

2 **Facilitator: this record**. 3 **Choose a mentor**. 4 **Set level**. 5 **Delete this record (entered by mistake)**.

Delete: 6 read what goes. 7 **Why**. 8 Type the name. 9 **Delete the record**.

Set level also takes the day a student first joined, for students who came before the app. **Delete** is only for a record typed by mistake, such as a second copy of the same person. A record with an app login, a visit or anything recorded about the student cannot be deleted: for a person who asks to be forgotten, use **Data requests** (page 15).

If something goes wrong

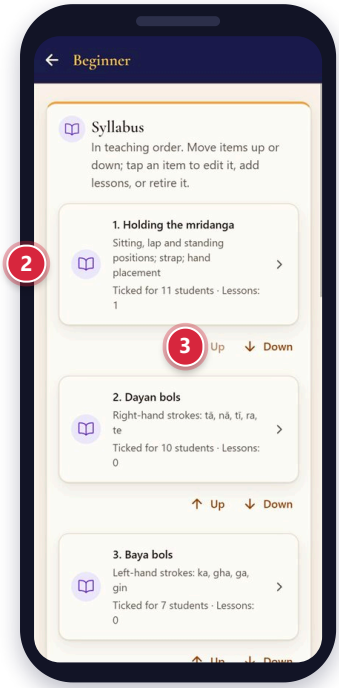

- The delete is refused: the record has a login, a visit or other history. Keep it, or set its status to Left.
- The roll number of a deleted record is never given again; the change history keeps a copy.

6 · TEACHING

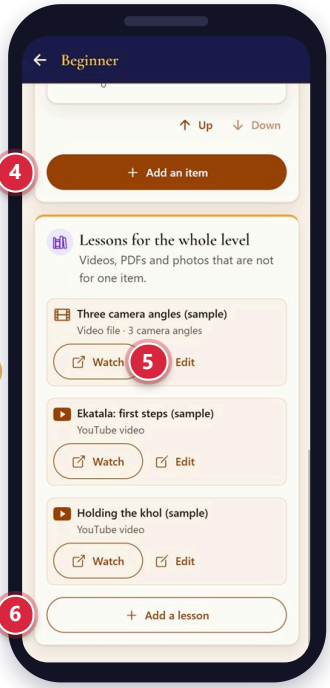

Levels, syllabus and lessons

For: The Guru. Coordinators can read the syllabus but not change it.

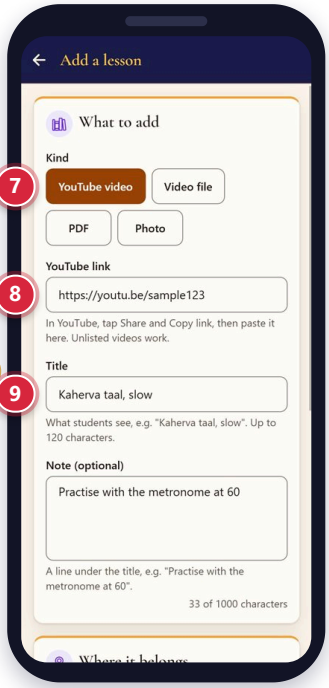

Home → **Lessons**. Each level has its items in teaching order, and lessons: YouTube videos, video files, PDFs and photos.

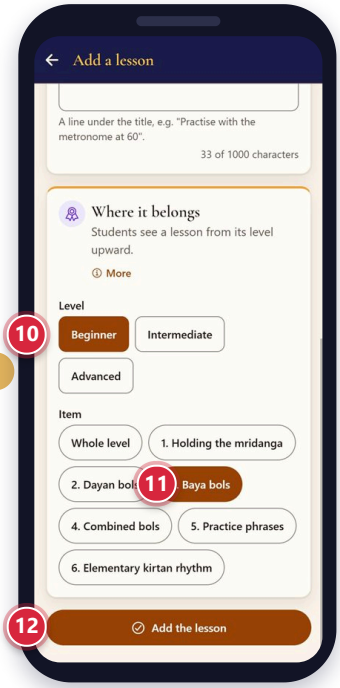

Home → **Lessons** → a level: 2 tap an item to edit or retire it. 3 **Up** / **Down**.

4 **Add an item**. 5 **Edit** a lesson. 6 **Add a lesson**.

7 **Kind**. 8 The link (in YouTube: Share, Copy link). 9 **Title** students see.

10 **Level**. 11 The item, or **Whole level**. 12 **Add the lesson**.

Students see a lesson from its level upward. **Retire** hides an item but keeps the ticks students already have; **Delete** works only for an item nobody ticked and no lesson points to.

If something goes wrong

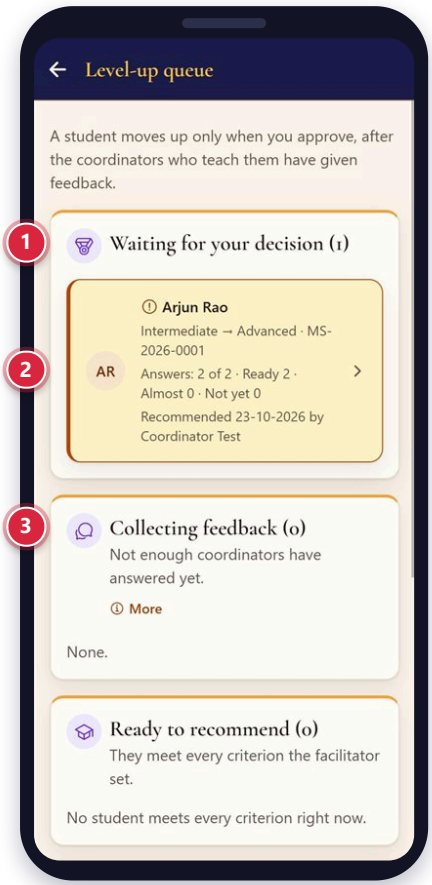

- A YouTube link is refused: copy it again from Share → Copy link. Unlisted videos work; private ones do not.
- A file is too big: PDFs and photos up to 10 MB.

7 · TEACHING

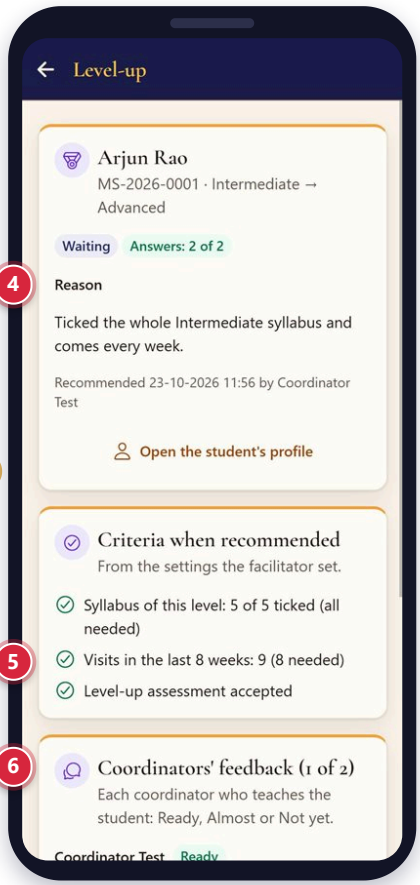

Decide a level-up

For: The Guru. Only the Guru moves a student up; the app never does it by itself.

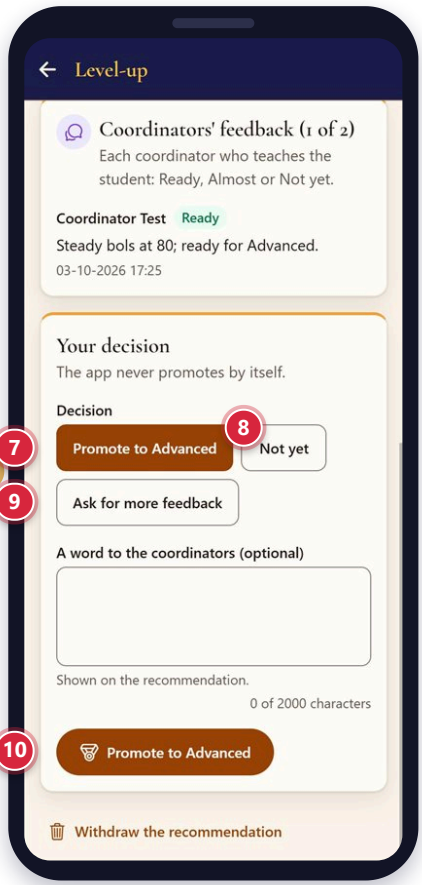

A coordinator recommends a student; the coordinators who teach them answer **Ready**, **Almost** or **Not yet**. Then it waits for you.

Home → **Level-ups**: 1 **Waiting for your decision**. 2 Tap the student. 3 Still collecting answers.

4 **Reason**. 5 **Criteria when recommended**. 6 **Coordinators' feedback**.

7 **Promote**, 8 **Not yet** or 9 **Ask for more feedback**. 10 The button to confirm.

The last step: after choosing, tap the button at the foot (10) and confirm. **Promote** changes the student's level and keeps it in the level history. **Not yet** asks for guidance and a date from which they can be recommended again. The criteria (syllabus, visits, assessment, answers needed) are set in **Settings** (page 13).

If something goes wrong

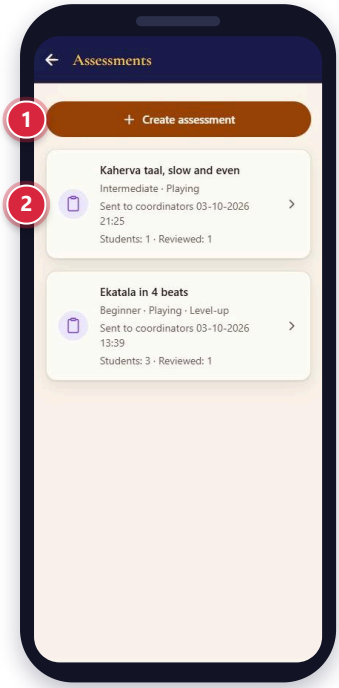

- A recommendation waits in **Collecting feedback**: not enough coordinators have answered. **Ask for more feedback** reminds those who have not.
- Recommended by mistake: **Withdraw the recommendation** at the foot of the page.

8 · TEACHING

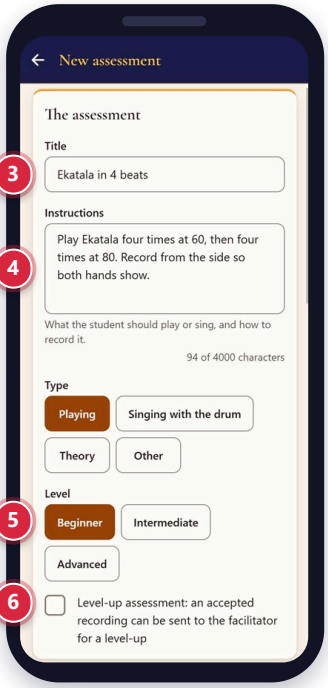

Write an assessment for the coordinators

For: The Guru. Coordinators give it to students (coordinator guide, pages 15-16).

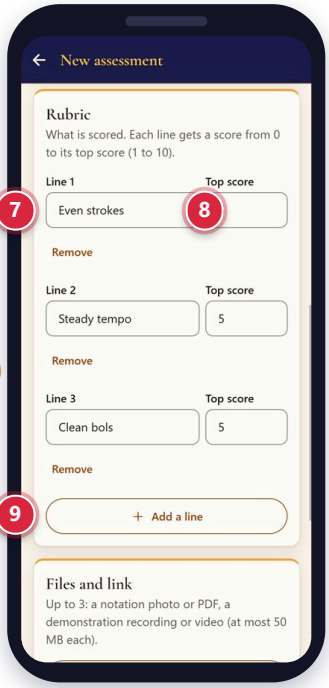

An assessment is a short task students record and send, scored line by line. You write it once; coordinators pick the students and review.

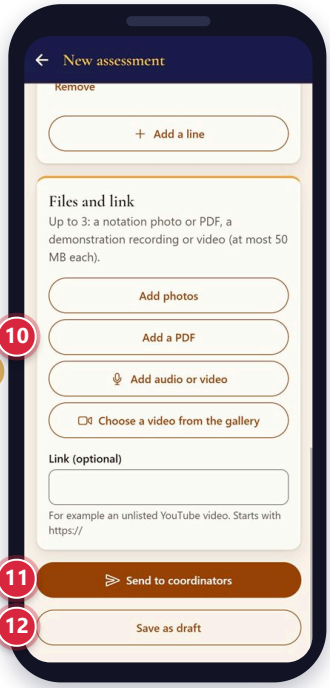

Home → **Assessments**: 1 **Create assessment**. 2 Each one: students and reviewed.

3 **Title**. 4 **Instructions**. 5 **Level**. 6 Tick for a **Level-up assessment**.

Rubric: 7 what is scored, 8 **Top score** (1-10). 9 **Add a line**.

10 A demonstration or notation. 11 **Send to coordinators**. 12 Or **Save as draft**.

A draft is only yours until you send it. A level-up assessment, once accepted, lets a coordinator send the student's level-up to you. The list shows how many students have it and how many were reviewed.

If something goes wrong

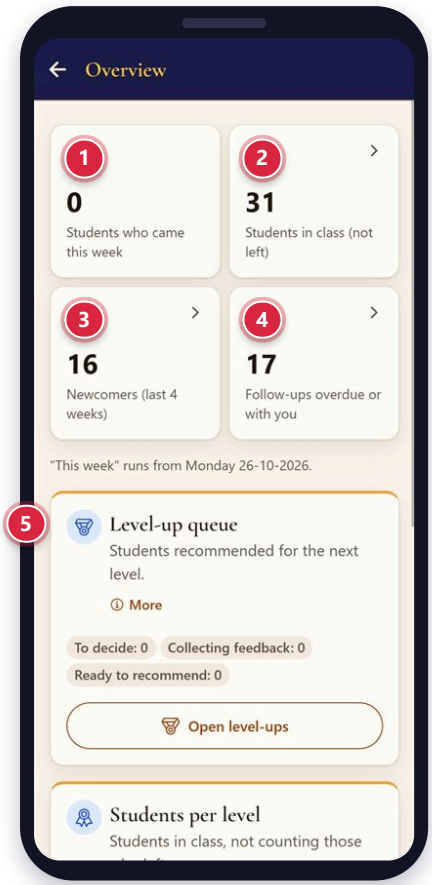

- Coordinators do not see it: it is still a draft. Open it and **Send to coordinators**.
- Files: up to 3, at most 50 MB each.

9 · REPORTS

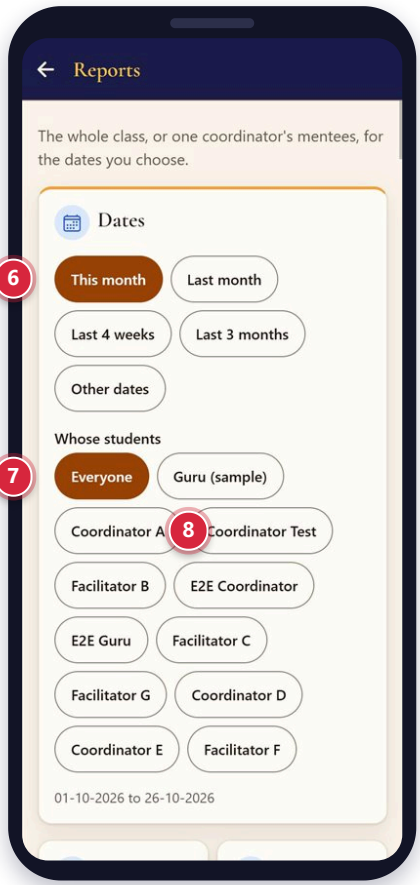

Overview, reports and how students found us

For: The Guru.

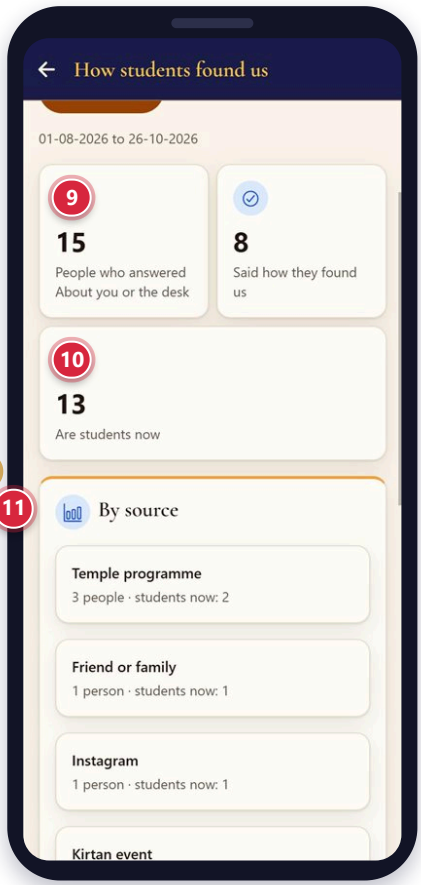

Three ways to see how the class is doing: the **Overview** at a glance, **Reports** for any dates, and where new people come from.

Home → **Overview**: 1 came this week, 2 in class, 3 newcomers, 4 follow-ups. 5 Level-ups.

Menu → **Reports**: 6 the dates. 7 **Everyone**, or 8 one coordinator's students.

Menu → **How students found us**: 9 who answered, 10 students now, 11 **By source**.

Further down in **Reports**: visits per week and month, flagged check-ins, follow-ups, syllabus progress per level, each student's line, and **Download CSV** for Excel. It is the coordinators' **My reports** (coordinator guide, page 22) for the whole class.

If something goes wrong

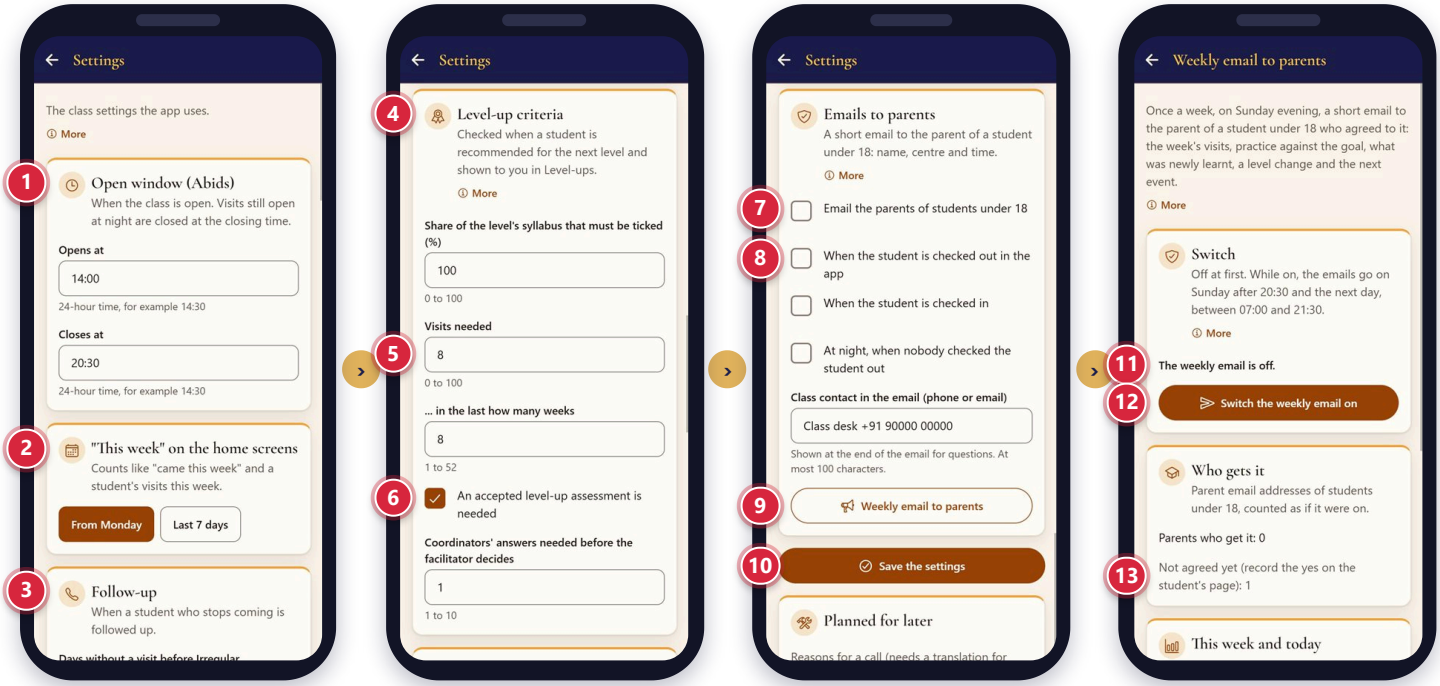

- A number looks too low: check the dates chip and **Whose students** (Everyone).
- Where the CSV goes: on the web it downloads like any file; in the Android app choose a folder or share it.

10 · SET-UP

Settings, and emails to parents

For: The Guru. Changes take effect at once for everyone.

Menu → **Settings** holds the class rules the app uses. Every change is kept in the change history.

1 **Open window**. 2 **"This week"** on Home. 3 **Follow-up**: days to Irregular, Inactive, the call.

4 **Level-up criteria**: syllabus %, 5 visits in weeks, 6 an accepted level-up assessment.

7 **Email the parents of students under 18**, 8 at check-out. 9 **Weekly email to parents**. 10 **Save the settings**.

11 On or off now. 12 **Switch the weekly email on**. 13 Parents not agreed yet.

Nothing changes until **Save the settings**. The parents' emails go only to parents of students under 18 with a current consent; never a location or a photo. The weekly email (Sunday evening) goes only to parents whose signed "yes" (form line D) is recorded on the student's page. The last step of the switch: tap it and confirm with **Yes, switch on**.

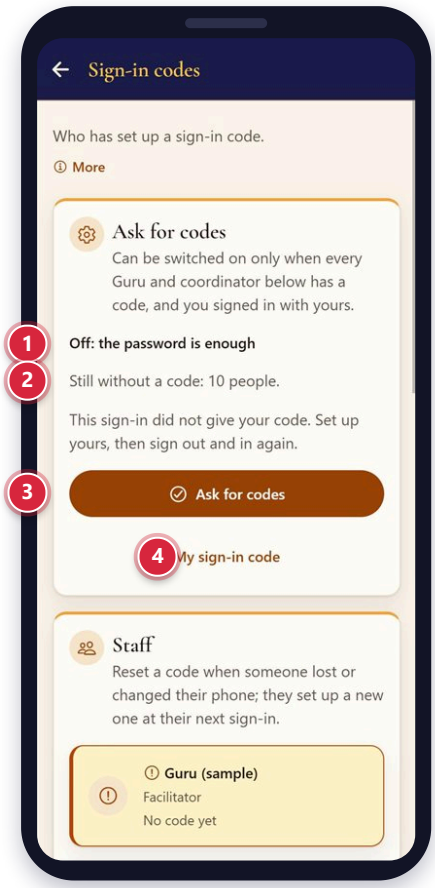

If something goes wrong

- "Fix the marked fields first": a number is outside its range (shown under the box). Correct it and save again.
- "Inactive must come after Irregular": give Inactive more days than Irregular.
- A parent asks to stop the emails: on the student's page, stop them for that parent; the class switch stays as it is.

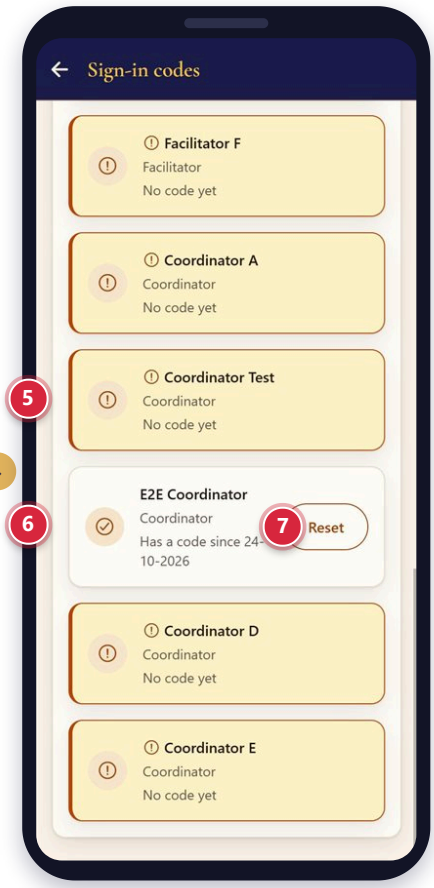

Sign-in codes: who has one, reset a lost one

For: The Guru. Every staff member sets up their own code (coordinator guide, page 4).

A sign-in code keeps parents' details and call notes safe. This screen shows who has one; when everyone has, switch **Ask for codes** on.

Menu → **Sign-in codes**: 1 on or off now. 2 **Still without a code**. 3 **Ask for codes**. 4 **My sign-in code**.

5 **No code yet**. 6 **Has a code since ....** 7 **Reset** for a lost or changed phone.

The last step of a reset: tap **Reset**, then **Tap again** to confirm; the person sets up a new code at their next sign-in. **Ask for codes** can be switched on only when every Guru and coordinator has a code and you signed in with yours.

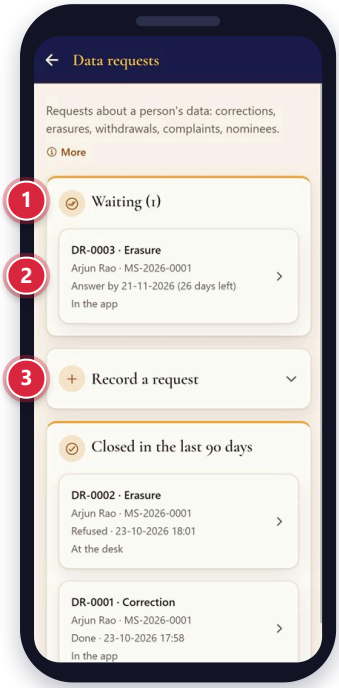

If something goes wrong

- "This sign-in did not give your code": set up your own code in My profile, then sign out and in again.
- Your own code cannot be reset here. If you lose your phone, the person who looks after the app removes it.

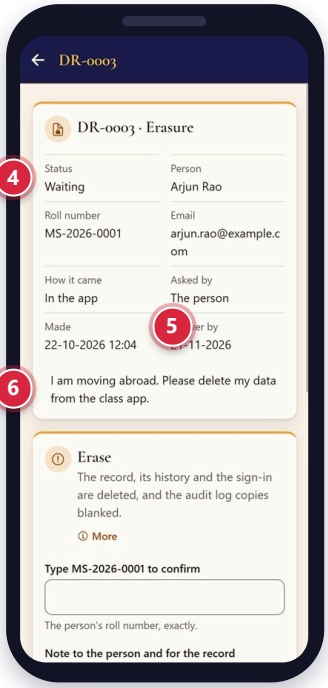

Data requests: copy, correction, erasure, withdrawal

For: The Guru. Every request is answered within 30 days.

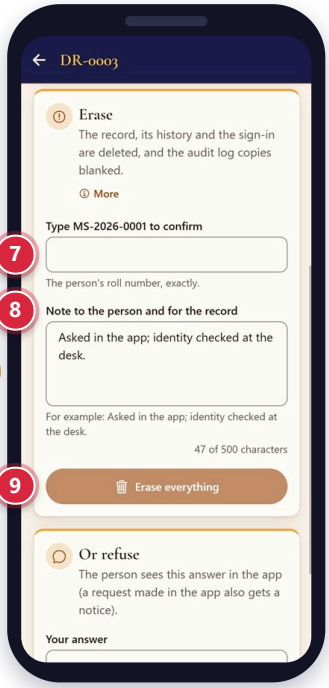

A person (or a child's parent) may ask for a copy of their data, a correction, erasure, or to withdraw consent. Requests made in the app arrive here; record those made at the desk or by email.

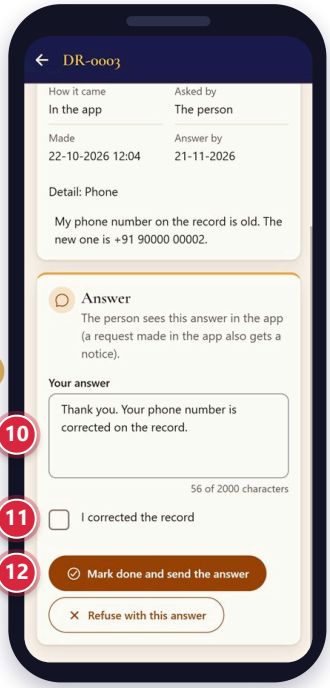

Home → **to do** → **Data requests**: 1 **Waiting**. 2 Tap one. 3 **Record a request**.

4 Who and what. 5 **Answer by**. 6 Their words.

Erase or withdraw: 7 type the roll number, 8 a note, 9 the red button.

Copy or correction: 10 **Your answer**, 11 **I corrected the record**, 12 **Mark done and send the answer**.

The last step of an erasure: type the roll number exactly, then **Erase everything**. This cannot be undone: the record, its history and the sign-in go; only the roll number, the date, your note and the reference stay. Take back any lent instrument first. **Withdraw consent** freezes the record and switches the sign-in off; tell the person by phone or email. **Or refuse** sends your answer instead.

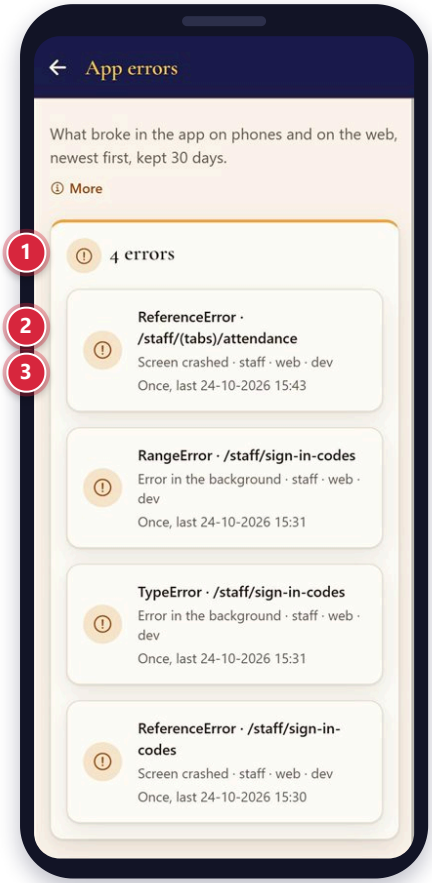

If something goes wrong

- A child's record: only a parent or guardian may ask. Check who asked (and their ID at the desk) before you act.
- Amber or "days late": answer it first; the 30 days are counted from the day it was made.

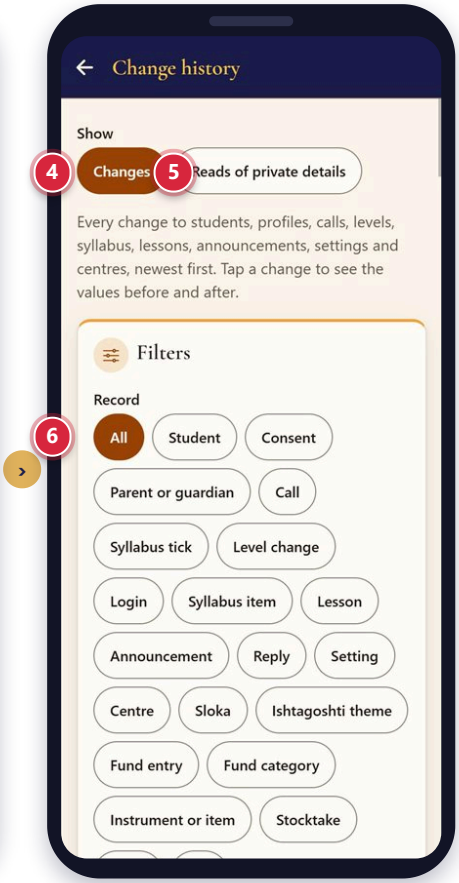

App errors and the change history

For: The Guru.

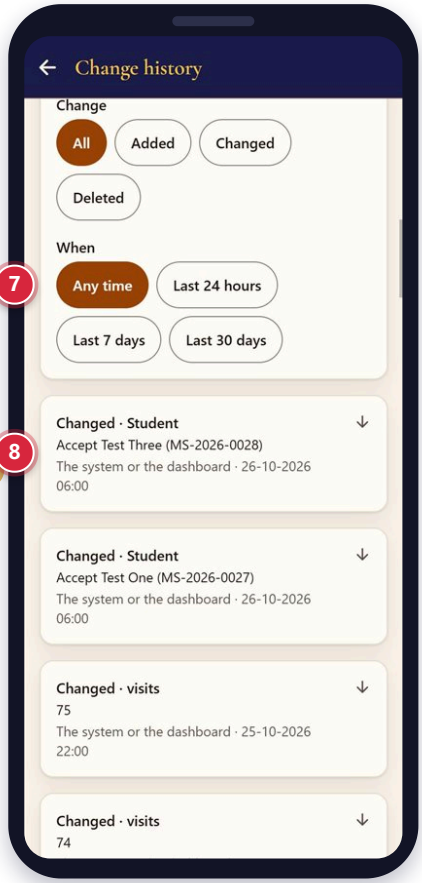

App errors shows what broke in the app, without names. **Change history** shows who changed what, and when.

Menu → **App errors**: 1 how many. 2 The error and the screen. 3 Crash or background, staff or student, web or phone.

Menu → **Change history**: 4 **Changes**, 5 **Reads of private details**. 6 **Filters**.

7 **When**. 8 Tap a change to see the values before and after.

Errors are kept 30 days. Tell the person who looks after the app about anything that repeats. **Reads of private details** lists who opened a parent's details, consents or call notes.

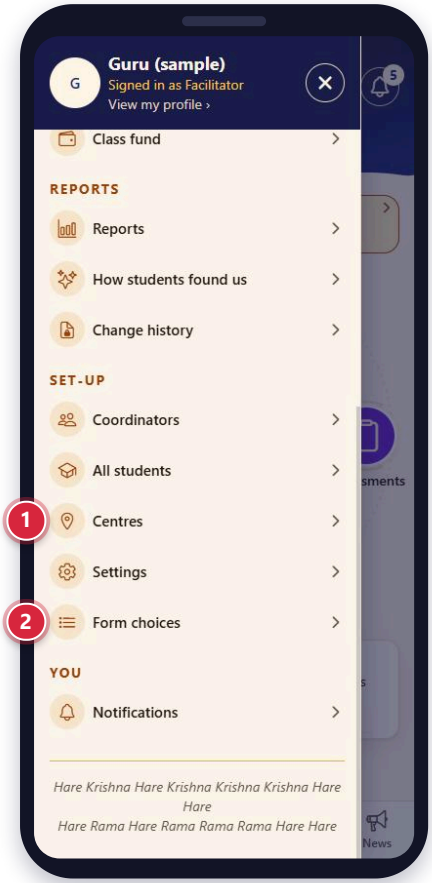

If something goes wrong

- "The error log is not set up on the server yet": tell the person who looks after the app.
- A change by "The system or the dashboard": made by the app's nightly jobs or by the person who looks after the server.

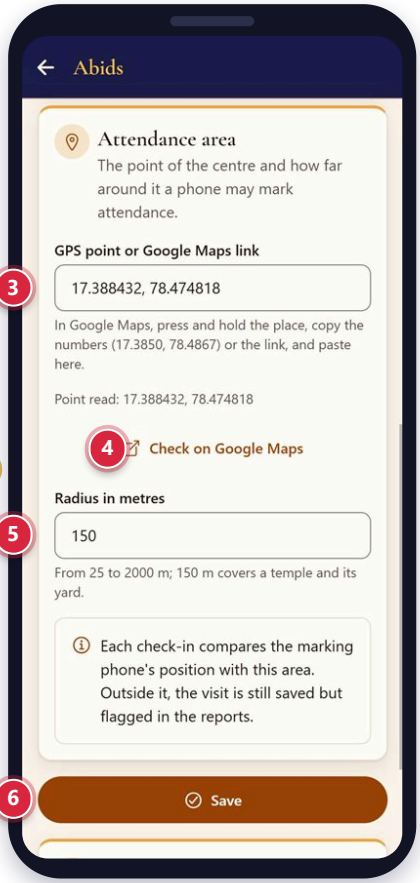

Centres and form choices

For: The Guru, when a place or a list changes.

Centres hold each place's address, open hours and attendance area. **Form choices** are the lists offered at sign-up, in About you and at the desk.

Menu → 1 **Centres** or 2 **Form choices**.

A centre: 3 **GPS point or Google Maps link**, 4 **Check on Google Maps**, 5 **Radius in metres**, 6 **Save**.

7 Pick a **List**. 8 A choice in English, Telugu, Hindi. 9 **Edit**, **Up**, **Down**, **Switch off**.

A check-in outside the attendance area is still saved, but flagged in the reports. A centre is never deleted: **Switch off** keeps its visits. A choice somebody already picked can only be switched off, not deleted. **Add an option** at the foot of a list.

If something goes wrong

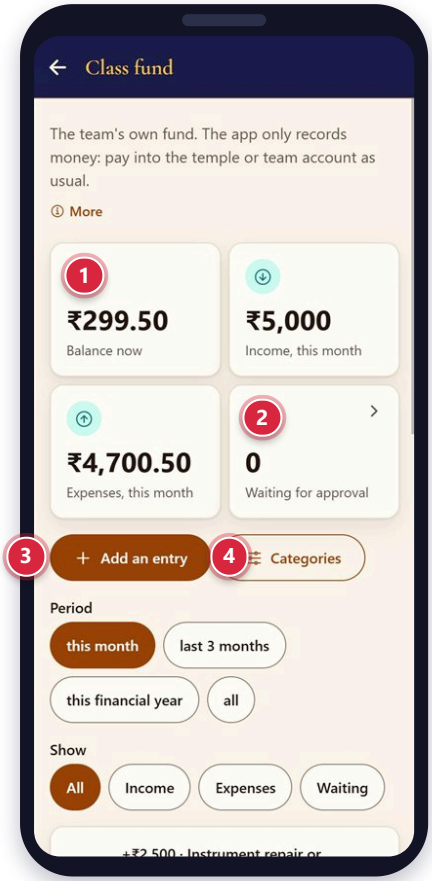

- Point not read: in Google Maps press and hold the place, copy the numbers (like 17.3850, 78.4867) and paste them.
- A new choice shows in English only: fill its Telugu and Hindi words with **Edit**.

15 · SEVA

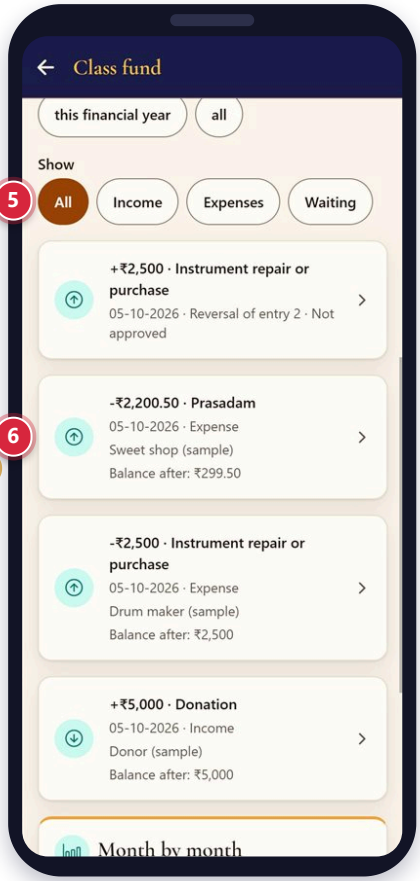

The class fund

For: The Guru and the treasurer. Coordinators can only read it.

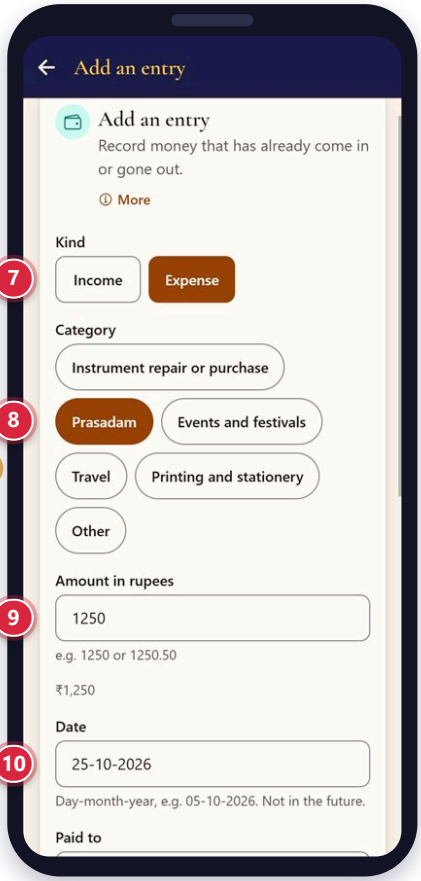

The app only records money; pay into the temple or team account as usual. Every entry stays in the ledger.

Menu → **Class fund**: 1 **Balance now**. 2 **Waiting for approval**. 3 **Add an entry**. 4 **Categories**.

5 **Show**: income, expenses, waiting. 6 An entry with the balance after it.

7 **Income** or **Expense**. 8 **Category**. 9 **Amount**. 10 **Date**. Then **Save the entry**.

Expenses over the approval limit wait for you (the Guru's own wait for a treasurer); a bill photo is needed over the bill limit. Both limits are in **Settings** (page 13). To approve: open the waiting entry, **Approve** or **Decline** with a reason. A mistake is never deleted: **Reverse** it with a reason. Name a treasurer on the coordinator's page (page 6).

If something goes wrong

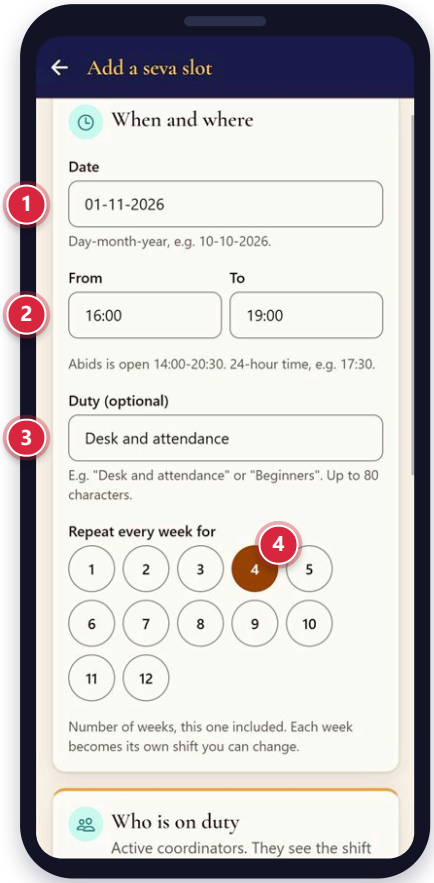

- "Not in the future": the date is the day the money moved, today or earlier.
- The balance looks wrong: check **Waiting** entries; only approved ones count.

16 · SEVA

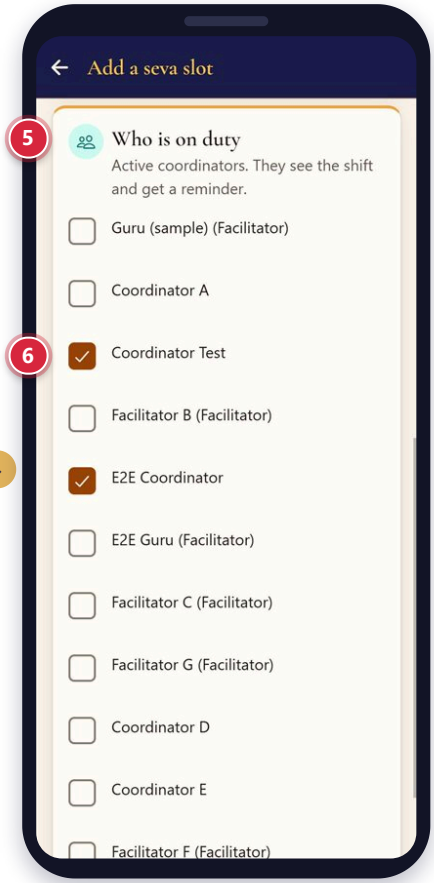

Plan the Seva roster

For: The Guru. Coordinators see their shifts (coordinator guide, page 20).

A seva slot is a shift: a date, the hours, a duty and the coordinators on it. They see it in **My shifts** and get a reminder the evening before.

Menu → **Seva roster** → **Add a seva slot**: 1 **Date**, 2 **From** / **To**, 3 **Duty**, 4 **Repeat every week for**.

5 **Who is on duty**: 6 tick them. Then **Add the seva slot**.

The hours must be inside the centre's open window. Repeating makes one shift per week, each of which you can change or delete on its own. Tap a shift in the roster to change it.

If something goes wrong

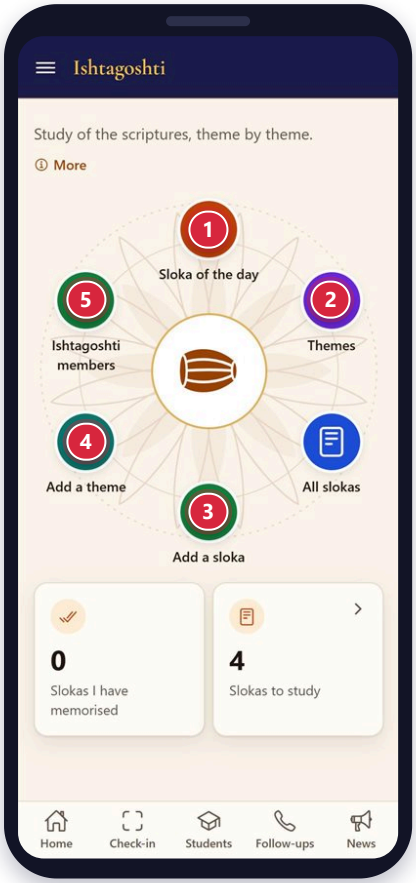

- The times are refused: choose times inside the open window shown under the boxes, or change the window in Settings.
- A coordinator is not in the list: their login is switched off, or they are not a coordinator yet (page 5).

17 · ISHTAGOSHTI

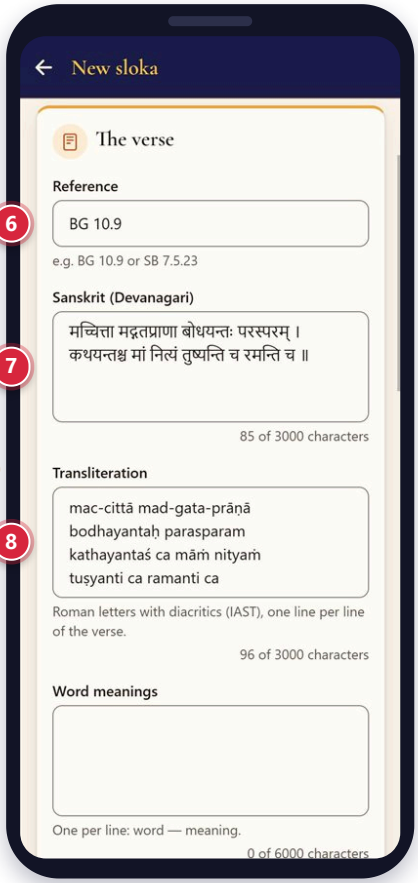

Ishtagoshti: slokas and themes

For: The Guru, and coordinators the Guru made Ishtagoshti editors.

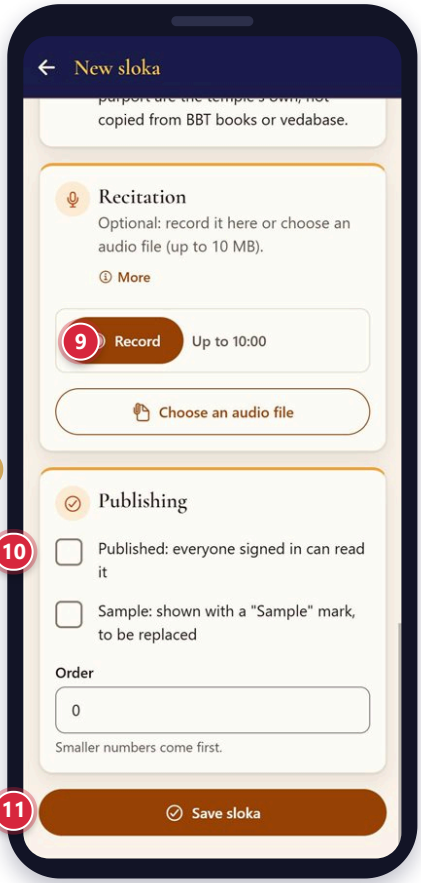

Home → **Ishtagoshti**. Add the slokas the class studies and group them in themes. Students read them in **Slokas**.

1 **Sloka of the day**. 2 **Themes**. 3 **Add a sloka**. 4 **Add a theme**. 5 **Ishtagoshti members**.

6 **Reference**, e.g. BG 10.9. 7 **Sanskrit**. 8 **Transliteration**, then word meanings and translation.

9 **Record** the recitation. 10 **Published**. 11 **Save sloka**.

Type only the temple's own translation, word meanings and purport; never copy BBT books or vedabase. The Sanskrit verse itself is free to use. The default translator's name is in **Settings**. **Ishtagoshti members** are people from outside the class who joined for free; you can block one there.

If something goes wrong

- A sloka is not seen by students: tick **Published** and save.
- A recording is too big: up to 10 minutes or 10 MB.

Quick help

Most problems have a simple fix. If none of these helps, tell the person who looks after the app.

What happened	What to do
A helper signed up but is not a coordinator	Menu → **Coordinators** → **Waiting for a role** → **Make a coordinator** (page 5).
A coordinator lost or changed their phone	**Sign-in codes** → **Reset** beside their name (page 14).
Two records for one person	Keep the right one; on the copy, **Delete this record (entered by mistake)** (page 8).
Someone asks to be forgotten	**Data requests**: record it, then erase with the roll number (page 15).
A coordinator leaves	Move their mentees, then **Switch off** on their page (page 6).
A level-up waits for days	Home → **Level-ups** → **Waiting for your decision** (page 10).
Calls are piling up	Menu → **Follow-ups by coordinator**: see whose calls are late.
The app looks different from these pictures	Your app may be newer. **My profile** → **What's new** shows what changed.

> Welcome desk, check-in, students, calls, news, groups, events and polls, instruments, QR cards: see the **coordinator guide**. Privacy questions from parents: **My profile** → **See my data and rights** → **Who to contact**.
